life forms that are too small to see without a microscope Specifically she wanted to understand the microbes that lived inside
other organisms like plants and people But as she began reading books scholarly articles blogs and even attending an online
course in an attempt to grasp the microbiology she quickly realized she couldn't do it alone That's why she enrolled at
Columbia University to study Ecology Evolution and Environmental Biology Her stories about being a middle aged mom
embedded in undergrad college life are spot on and hilarious But more profoundly when Bone went back to school she
learned that biology is a vast conspiracy of microbes Microbes invented living and as a result they are part of every aspect of
