The Islamic Design Module in Latin America John F. Moffitt, 2004-07-15 This study analyzes the distinctive look of Hispanic architecture Its triangulate format originated in Islamic Spain was based on workshop techniques once used by journeyman designers and simple artisans Spain was the only European transatlantic colonial power to have once been occupied by Islamic overlords Spain s conquistadors took their traditional building methods to Latin America Formal analyses of the facades of various Latin American churches reveal them to reiterate procedures worked out in Andalusia by Islamic builders in the ninth and tenth centuries Though widely separated by time and place both share a proportionate system determining abstract ratios in both cases this regulating format was derived from manipulations of the Pythagorean triangles This trazado regulador is only expressed in ratios with no numbers and is illustrated here with 85 visual examples including measured drawings of Egyptian Greek Roman and medieval European prototypes Grounded in historical and physical data the research is partially drawn from four practical builders manuals two seventeenth century Spanish ones and two Mexican ones from ca 1640 and 1800 In an appendix Viollet le Duc a major nineteenth century architect explains architectural proportionality and the design function of the Pythagorean Triangle

Handbook of Research on Visual Computing and Emerging Geometrical Design Tools Amoruso, Giuseppe,2016-04-11 Visual computing and descriptive geometry are multidisciplinary fields addressing the handling of images 3D models and other computer graphics These ideas are experiencing a revival due to emergent technologies and applications available to developers Based in traditional forms of design and architecture these fields are currently experiencing a bounty of new research based on old principles The Handbook of Research on Visual Computing and Emerging Geometrical Design Tools seeks to add to this knowledge base by considering these technologies from a designer s perspective rather than reiterating the principles of computer science It combines aspects of geometry and representation with emerging tools for CAD generation and visualization while addressing the digital heritage of such fields This book is an invaluable resource for developers students of both graphic and computer generated design researchers and designers

The Historiography of Persian Architecture Mohammad Gharipour,2015-08-27 Historiography is the study of the methodology of writing history the development of the discipline of history and the changing interpretations of historical events in the works of individual historians Exploring the historiography of Persian art and architecture requires a closer look at a diverse range of sources including chronicles historical accounts travelogues and material evidence coming from archaeological excavations The Historiography of Persian Architecture highlights the political cultural and intellectual contexts that lie behind the written history of Persian architecture in the twentieth century presenting a series of investigations on issues related to historiography This book addresses the challenges complexities and contradictions regarding historical and geographical diversity of Persian architecture including issues lacking in the 20th century historiography of Iran and neighbouring countries This book not only illustrates different trends in Persian architecture but also clarifies changing notions of research in this field Aiming to introduce new tools of analysis the book offers fresh insights into the discipline supported by historical documents archaeological data treatises and visual materials It brings together well established and emerging scholars from a broad range of academic spheres in order to question and challenge pre existing historiographical frameworks particularly through specific case studies Overall it provides a valuable contribution to the study of Persian architecture simultaneously revisiting past literature and advancing new approaches This book would be of interest to students and scholars of Middle East and

Iranian Studies as well as Architectural History including Islamic architecture and historiography **Incised Drawings from Early Phrygian Gordion** Lynn E. Roller, 2011-09-01 In 1950 the University of Pennsylvania Museum of Archaeology and Anthropology began excavations at the ancient Phrygian capital of Gordion in central Turkey The Museum s Gordion Project continues today with researchers from many disciplines and with many specializations contributing to a growing and sometimes changing body of information and understanding about this complex and multifaceted site inhabited by peoples and diverse civilizations for millennia In this volume of Gordion Special Studies Lynn E Roller focuses on a series of stone blocks with incised figural and abstract drawings recovered from early Phrygian structures at Gordion The great majority of the incised stones come from a single structure within the Early Phrygian citadel at Gordion known as Megaron 2 a stone building with several remarkable features and a likely candidate for the citadel s temple The volume begins with a description of the excavation of the stones and a discussion of Megaron 2 Next is an analysis of the subject matter of the drawings by type describing scenes of human figures animals architectural drawings geometric patterns and formless marks A discussion follows of the sources from which the drawings could have been taken and of parallels with similar scenes and designs on objects in other media from Gordion and other contemporary sites in Anatolia The fourth section proposes an explanatory hypothesis on the origin of the drawings and considers who could have made them and why Parallels with comparable drawings from Anatolia and the Near East are discussed here The final section summarizes the contribution of the drawings to our understanding of the development of the Early Phrygian material at Gordion University Museum Monograph 130
