Teaching Mathematics in Grades 6 - 12 Randall E. Groth, 2012-08-10 *Teaching Mathematics in Grades 6 12* by Randall E

Groth explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows preservice mathematics teachers the value of being a researcher constantly experimenting with methods for developing students' mathematical thinking and connecting this research to practices that enhance students' understanding of the material. Ultimately, preservice teachers will gain a deeper understanding of the types of mathematical knowledge students bring to school and how students' thinking may develop in response to different teaching strategies. Middle Math Mary B. Eron, Sidney L. Rachlin, 2015-10-01. Originally published in 2005. This monograph represents the work of many mathematics teacher educators who explored the content knowledge and pedagogical knowledge that make up the middle grades learning experience. The middle grades remains a unique period of time in students' development and as such provides both challenges and promising opportunities for those who prepare teachers of middle grades mathematics. This work is the final product of an exciting NSF-supported endeavor that gathered leaders in the field and explored curriculum case studies of program models at several institutions as well as issue papers on such key topics as assessment technology and preparing culturally responsive teachers. AMTE hopes this monograph will stimulate discussion and bring attention to this critical period of schooling.
