

25. Re-fit the gears as shown in the Fig. below. Fit the cover together with a new gasket. Tighten up the 4 bolts and rotate the shaft to make sure that it does not jam. Fit the key in its groove and re-fit the gear wheel. Fit the spring washer and tighten up the gear with the nut.

26. Remove the bolt 1 for the relief valve and check that the spring 2 and piston are in good condition. If there is anything suspicious about the opening pressure of the relief valve, check the data for the spring. See under "Technical Data, Lubricating oil pump". Clean and re-fit the piston and spring and tighten up the bolt.

27. Check for wear on pistons, piston rings and gudgeon pins. Replace if necessary. The piston and connecting rod must be matchfitted as shown in fig. A. Make absolutely certain that the groove ring for the gudgeon pin is fitted in its groove. The piston rings are fitted with a piston ring rod. Begin with the oil ring 1 (fig B) in the lowest groove. Continue with the compression ring 2. Finally fit the compression ring 3. NOTE! The marking TOP must face upwards. The other two rings can be faced as desired.

Crankshaft

28. Check the drive gear on the crankshaft for wear or damage. Remove the drive gear with a puller. Remove the key and clean the shaft. Check for wear and grind the shaft if necessary. (See under "Technical Data".) Clean the engine block and all other parts which must be re-fitted.

Md 2b Work Manual
