Minority Report Like Interface:

Cinematic Interfaces Seung-hoon Jeong, 2013-07-11 In this book Seung hoon Jeong introduces the cinematic interface as a contact surface that mediates between image and subject proposing that this mediation be understood not simply as transparent and efficient but rather as asymmetrical ambivalent immanent and multidirectional Jeong enlists the new media term interface to bring to film theory a synthetic notion of interfaciality as underlying the multifaceted nature of both the image and subjectivity Drawing on a range of films Jeong examines cinematic interfaces seen on screen and the spectator s experience of them including the direct appearance of a camera filmstrip screen the character s bodily contact with such a medium interface the object s surface and the subject s face as quasi interface and the image itself Each of these case studies serves as a platform for remapping and revamping major concepts in film studies such as suture embodiment illusion signification and indexicality Looking to such theories as the ontology of the image and the phenomenology of the body this original theorization of the cinematic interface not only offers a conceptual framework for rethinking and re linking film and media studies but also suggests a general theory of the interface

Make It So Nathan Shedroff, Christopher

Dawn of the New Everything

Jaron Lanier, 2024-09-04 The father of virtual reality explains its dazzling possibilities by reflecting on his own lifelong relationship with technology Named one of the best books of 2017 by The Economist The Wall Street Journal Vox A deeply human highly personal and beautifully told story Dave Eggers Bridging the gap between tech mania and the experience of being inside the human body Dawn of the New Everything is a look at what it means to be human at a moment of unprecedented technological possibility Through a fascinating look back over his life in technology Jaron Lanier an interdisciplinary scientist and father of the term virtual reality exposes VR's ability to illuminate and amplify our understanding of our species and gives readers a new perspective on how the brain and body connect to the world An inventive blend of autobiography science writing philosophy and advice this book tells the wild story of his personal and professional life as a scientist from his childhood in the UFO territory of New Mexico to the loss of his mother the founding of the first start up and finally becoming a world renowned technological guru Understanding virtual reality as being both a scientific and cultural adventure Lanier demonstrates it to be a humanistic setting for technology While his previous books offered a more critical view of social media and other manifestations of

technology in this book he argues that virtual reality can actually make our lives richer and fuller A highly eccentric memoir that traces the author's quest for VR back to its roots not as some sort of geeky engineering challenge but as a feeling he had as a child of being overwhelmed by the magic of the universe The Wall Street Journal Intimate and idiosyncratic quirky and fascinating Lanier's vivid and creative imagination is a distinct character in this book His vision is humanistic and he insists that the most important goal of developing virtual reality is human connection The New York Times Book Review *Lab Coats in Hollywood* David A. Kirby, 2013-02-08 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick's 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick's scientific verisimilitude in 2001 came courtesy of his science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don't consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action

Interfaces and Us Zachary Kaiser, 2023-01-12 We're all familiar with smart TVs making suggestions on our future watching real world exercise data being transferred into stats and infographics on our workout apps and turning up our home heating before we start our commute but how does this world of technological interfaces affect our actions and perceptions of self When society relies on computer models and their interfaces to explain and predict everything from love to geopolitical conflicts our own behaviour and choices are artificially changed Zachary Kaiser explores the harmful social consequences of this idea balanced against speed and ease for the user and how design practice and education can respond positively Concepts of freedom vs convenience Smart objects and manipulation Real world information transformed into data Technology's decisions made on our behalf
