

GIZMOS STUDENT EXPLORATION: HALF-LIFE

Student Exploration: Half-life

Vocabulary: daughter atom, decay, Geiger counter, half-life, isotope, neutron, radiation, radioactive, radiometric rating, radioactive waves

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Have you ever made microwave popcorn? If so, what do you hear while the popcorn is in the microwave? **When popcorn is in the microwave, popping noise comes out of the microwave.**
2. If you turn the microwave on for two minutes, is the rate of popping always the same, or does it change? Explain. **The rate is different because the radioactive waves pops the popcorn at different times.**

Gizmo Warm-up

Like an unpopped kernel in the microwave, a **radioactive** atom can change at any time. Radioactive atoms change by emitting **radiation** in the form of tiny particles and/or energy. This process, called **decay**, causes the radioactive atom to change into a stable **daughter atom**.

The *Half-life* Gizmo™ allows you to observe and measure the decay of a radioactive substance. Be sure the sound is turned on and click **Play** (▶).

1. What do you see and hear? **I hear popping noises and I see radioactive waves.**
Note: The clicking sound you hear comes from a **Geiger counter**, an instrument that detects the particles and energy emitted by decaying radioactive atoms.
2. What remains at the end of the decay process? **Daughter atoms replaced the radioactive atoms. So there is only daughter atoms.**

The Purposeful Graduate Tim Clydesdale,2015-05-06 We all know that higher education has changed dramatically over the past two decades Historically a time of exploration and self discovery the college years have been narrowed toward an increasingly singular goal career training and college students these days forgo the big questions about who they are and how they can change the world and instead focus single mindedly on their economic survival In *The Purposeful Graduate* Tim Clydesdale elucidates just what a tremendous loss this is for our youth our universities and our future as a society At the same time he shows that it doesn't have to be this way higher education can retain its higher cultural role and students with a true sense of purpose of personal cultural and intellectual value that cannot be measured by a wage can be streaming out of every one of its institutions The key he argues is simple direct systematic and creative programs that engage undergraduates on the question of purpose Backing up his argument with rich data from a Lilly Endowment grant that funded such programs on eighty eight different campuses he shows that thoughtful engagement of the notion of vocational calling by students faculty and staff can bring rich rewards for all those involved greater intellectual development more robust community involvement and a more proactive approach to lifelong goals Nearly every institution he examines from internationally acclaimed research universities to small liberal arts colleges is a success story each designing and implementing its own program that provides students with deep resources that help them to launch flourishing lives Flying in the face of the pessimistic forecast of higher education's emaciated future Clydesdale offers a profoundly rich alternative one that can be achieved if we simply muster the courage to talk with students about who they are and what they are meant to do
