Higher Level Decimal Multiplication Word Problems:

The Development of Multiplicative Reasoning in the Learning of Mathematics Guershon Harel, Jere Confrey, 1994-06-28 Two of the most important concepts children develop progressively throughout their mathematics education years are additivity and multiplicativity Additivity is associated with situations that involve adding joining affixing subtracting separating and removing Multiplicativity is associated with situations that involve duplicating shrinking stressing sharing equally multiplying dividing and exponentiating This book presents multiplicativity in terms of a multiplicative conceptual field MCF not as individual concepts It is presented in terms of interrelations and dependencies within between and among multiplicative concepts The authors share the view that research on the mathematical cognitive and instructional aspects of multiplicative concepts must be situated in an MCF framework Understanding Numbers □ 5 C. Sailaja, Smita Ratish, Lata Wishram, Understanding Numbers is a carefully written series of mathematics to help students encourage the study of mathematics in the best interactive form It contains ample practice material attractive illustrations and real life examples for the students to relate the topics with their everyday life Special care has been taken while teaching topics like geometry and probability to the students Keeping in mind the development status and comprehension level of students the text has been presented in a well graded manner *Eureka Math Curriculum Study Guide* Common Core, 2015-03-23 Eureka Math is a comprehensive content rich PreK 12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year information on alignment to the instructional shifts and the standards design of curricular components approaches to differentiated instruction and descriptions of mathematical models The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade For teachers who are new to the classroom or the standards the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year The Eureka Math Curriculum Study Guide Grade 4 provides an overview of all of the Grade 4 modules including Place Value Rounding and Algorithms for Addition and Subtraction Unit Conversions and Problem Solving with Metric Measurement Multi Digit Multiplication and Division Angle Measure and Plane Figures Fraction Equivalence Ordering and Operations Decimal
