The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22

This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge production, the global economy, global security and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world. **Silk Road to Belt**

Road Md. Nazrul Islam, 2018-11-30. This volume approaches China's Belt and Road Initiative as a process of culturalization, one that started with the Silk Road and continued over the millennium. In mainstream literature, the Belt and Road Initiative (BRI) has been portrayed as the geo-economic vision and geo-political ambition of China's current leaders, intended to shape the future of the world. However, this volume argues that although geo-politics and geo-economy may play their part, the BRI more importantly creates a venue for the meeting of cultures by promoting people-to-people interaction and exchange. This volume explores the journey from the Silk Road to Belt Road by analyzing topics ranging from history to religion, from language to culture and from environment to health. As such, scholars, academics, researchers, undergraduate and graduate students from the Humanities, Social Sciences and Business will find an alternative approach to the Belt and Road Initiative.

Global Imperialism and the Great Crisis Ernesto Screpanti, 2014. In this provocative study, economist Ernesto Screpanti argues that imperialism is far from disappearing or mutating into a benign globalized form. It has in fact entered a new phase which he terms global imperialism. This is a phase defined by multinational firms cut loose from the nation-state framework and free to chase profits over the entire surface of the globe. No longer dependent on nation-states for building a political consensus that accommodates capital accumulation, these firms seek to bend governments to their will and destroy barriers to the free movement of capital. And while military force continues to play an important role in imperial strategy, it is the discipline of the global market that keeps workers in check by pitting them against each other, no matter what their national origin. This is a world in which the so-called labor aristocracies of the rich nations are demolished, the power of states to enforce checks on capital is sapped, and global firms are free to pursue their monomaniacal quest for profits unfettered by national allegiance. Screpanti delves into the inner workings of global imperialism, explaining how it is different from past forms of imperialism, how the global distribution of wages is changing, and why multinational firms have strained to break free of national markets. He sees global imperialism as a developing process, one with no certain outcome. But one thing is clear: when economic crises become opportunities to discipline workers, and when economic policies are

imposed through increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake

Societies in Transition Savvas Katsikides,Pavlos I. Koktsidis,2015-03-26 This edited volume discusses critically the social implications of current structural transformations in Europe within the broader context of the global financial crisis Experts from across Europe and the US discuss challenges and solutions to political and economic stability security growth governance and integration on a country and regional level especially focusing on vulnerable Southern and Eastern European states New economic political and security processes and realities are examined closely with the aim to describe them in a coherent framework Drawing on carefully selected interdisciplinary research this collection offers fresh insights into the social repercussions of the transition from traditionally established practices and perceptions to new forms of collaboration integration and governance

Financial Innovations and Monetary Reform Jean-François Serval,Jean-Pascal

Tranié,2023-01-30 Written by two leading experts on multinational accounting and billion dollar international investment funds this book provides a framework for a global reform of the world monetary system and defines a decidedly new approach to dealing with public debt mortgage an issue that we can see in many countries in Europe and around the world The authors put forward a proposal for transforming sterile financial masses which are withdrawn from the real economy as they no longer bear interest into wealth To facilitate this return to the real economy the authors propose that a significant share of public debt be converted into net equities in the world of business and goods production in order to find new profitable investment projects The idea is bold and the authors strive to demonstrate its technical feasibility They are convinced that this approach can accompany and enhance a movement that has already begun namely the implementation of vast national and international investment programs in major infrastructures and research projects in innovative sectors This work builds on the authors two previous books which focus on the monetary system The first published in 2010 and including a foreword by former French Finance Minister Christine Lagarde analyzes the new virtual dimension of money The second published in 2014 puts forward an innovative proposal for a new financial regulation aimed at more stable economies This third book is intended for professionals in the financial industry including decision makers at banks accounting and private equity firms as well as policymakers at central banks and government institutions involved in the implementation of financial and monetary reforms
