**Sustainable Development Goals and Pandemic Planning** Venkatachalam Anbumozhi, Kaliappa Kalirajan, Fukunari Kimura, 2022-06-10 This book assesses the progress in the implementation of Sustainable Development Goals (SDGs) in ASEAN India and China using the above framework conditions in the context with three main propositions: First, translating the SDGs into regional economic integration strategies during the pandemic recovery can enhance the link between global objectives and the multifaceted reality of an ASEAN community building process and providing a strategic option to strengthen the regional approaches. Secondly, a regional approach on complementarities to SDGs can facilitate the definition of relevant targets, indicators, and enhance the monitoring and evaluation framework. In so doing, it could also offer the scope to integrate more closely ASEAN community's social and environmental concerns into existing economic, social, and political frameworks. Thirdly, focusing just on the geo-economic sphere, the area where South East and East Asian economic integration is relatively more advanced, will prove the hypothesis that effective regional integration through mega trade agreements such as the Regional Comprehensive Economic Partnership (RCEP) can support the Asia's transformation agenda and foster more inclusive and sustainable growth.
