The Female Reproductive Tract Microbiome - Gatekeeper for Sexual and Reproductive Health Mariya Ivanova Petrova,Jo-Ann S. Passmore,Lindi Masson,2023-03-21 An optimal female reproductive tract FRT microbiome represents a cornerstone for successful reproductive and sexual health Although understanding the link between the microbiota and our health is the focus of a growing number of research programs and research has advanced in the last decade the FRT microbiome remains relatively poorly defined This is despite it being one of the most critical factors impacting fertility and the health of the future generation Important gaps in our knowledge remain about women specific microbial niches such as the lower FRT The vaginal microbiome of healthy women is almost exclusively dominated by Lactobacillus species making these species synonymous with vaginal health Largely thanks to their capacity to produce high levels of lactic acid lactobacilli are thought to inhibit most invading bacterial and viral pathogens Nonetheless the dogma that all Lactobacillus species are key beneficial species in the vaginal niche has been questioned based on the association with disease for some of the major players in the niche for example L iners particularly in non European or Caucasian cohorts Further the ability of other mostly anaerobic species besides lactobacilli to maintain similar homeostasis in the vaginal niche raises the question of what we define as optimal or healthy vaginal microbiota Answering this question is essential since a non optimal or dysbiotic vaginal microbiome has been linked to the acquisition of sexually transmitted infections STIs infertility and adverse pregnancy outcomes To confront these healthcare challenges we should be able to distinguish between an optimal and non optimal microbiome With the advance of sequence based technologies as well as other omics methodologies including metaproteomics metabolomics and culturomics we are now able to begin to correlate the presence as well as the activities of specific organisms and microbial communities with health or disease However we are only beginning to understand the complexity of interactions between bacterial community members with each other and the human host A better understanding of these relationships within this specialized environmental niche and in relation to female sexual and reproductive health is critical for the development of novel diagnostics and therapeutics to create and maintain an optimal FRT microbiome *Daily Trade Bulletin* ,1888 **Mycotoxins in Feed and Food Chain** Filippo Rossi,2021-01-21 The book deals with mycotoxins their presence in various types of food and how to prevent their presence in food In addition to well known molecules such as aflatoxins or fumonisins some contributors have dealt with emerging mycotoxins e g alternaria

toxins botryodiplodin Readers of the book can also find a new approach to reducing aflatoxins and fumonisins in food In conclusion the book presents both new mycotoxins and new information on old mycotoxins

Multilingualism in Mathematics Education in Africa Anthony A. Essien,2023-12-14 This book brings together the first book collection of African research in mathematics education in multilingual societies and chronicles current research in different linguistic contexts across the African continent including Algeria Namibia Malawi Morocco Rwanda South Africa on issues of multilingualism in mathematics education but more importantly it foregrounds pertinent issues for future research With many of the authors building on earlier path breaking African research the book is a unique contribution of careful thinking through how linguistic diversity and multilingualism manifest in ways that differ from one geopolitical context to another This volume is an important contribution to the growing recognition of multilingualism as the global linguistic dispensation in mathematics education It is an invitation to how we might as an international community where more and more multilingualism is the norm rather than an exception pay more attention to the multilingual agency and capabilities of both students and teachers in order to better harness the epistemic potential of multiple languages in contexts of language diversity in mathematics education

Roma in the Republic of Macedonia: Challenges and Inequalities in Housing, Education and Health Andrea Spítálszky,Roma Democratic Development Association SONCE,2018-11-21 The Republic of Macedonia s Roma population is still the most vulnerable minority in the country a community that faces both institutional marginalization and social prejudice This briefing drawing on the first hand accounts gathered by Roma mediators working with their communities provides crucial insights into their daily lives and the difficulties they continue to face Despite official recognition Roma remain excluded from mainstream society and experience discrimination in almost every aspect of their lives beginning at school and continuing into adult life with the majority of Roma unable to obtain formal employment As a result many Roma live in substandard living conditions often struggling with overcrowding and without access to basic services Roma in the Republic of Macedonia Challenges and Inequalities in Housing Education and Health outlines the range of challenges the country s Roma still face and includes a series of recommendations on how their situation can be improved These include a more inclusive approach to service provision greater awareness of the specific barriers experienced by the community and an emphasis on targeted strategies to address these disparities The briefing is available in English Macedonian Romani and Albanian
