

Weather Forecasts

Key Concept: **How do meteorologists use weather maps to predict the weather?**

Directions: Use the information and pictures.

1. How do you get information from weather maps? By using the symbols.

2. What are the general weather conditions in the central U.S. today? Clear.

3. What is the weather in the northeast today? Cloudy.

The pattern of the isobars on the map is that they go from the high pressure to the low pressure and the pressure decreases as they go from the high to the low.

4. How does the weather change from the high to the low? It changes from clear to cloudy.

The areas of high pressure are found in the Pacific states, the central U.S., and Florida.

5. How do you get information from the weather map? By using the symbols.

The precipitation is shown by the lines along the fronts. It shows the direction of the wind.

6. How do you get information from the weather map? By using the symbols.

The map can be used to predict the weather because the isobars show the direction of the wind and the pressure.
