Hardisty,Ece Ozdemiroglu,2004-12-20 Economic literature is often too theoretical for engineers and policymakers to put into practical use while scientific literature on the remediation of contaminated aquifers rarely considers costs and benefits Written by a hydrogeologist and an economist The Economics of Groundwater Remediation and Protection integrates economics and cost benefit analysis tools with optimal protection and remediation strategies for groundwater resources The book provides a thorough introduction of the concepts of groundwater flow and contaminant transport and the basics of economic decision making techniques It illustrates the types of risks and impacts caused by groundwater contamination and the economic benefits of its remediation The volume reviews a wide range of issues such as cost implementation and expectations of success for the latest remediation trends and techniques The book shows how economic analysis can be used to determine how much we should pay for groundwater clean up and when spending too much or too little actually makes us all worse off The authors step by step methodology for decision making focuses on determining optimal remedial objectives from containment to extensive cleanup and the selection of least cost alternatives They use examples from their personal experience to illustrate the methodologies in action and put the issues into perspective Combining the theoretical and practical aspects of science policy and economics this book places the importance of groundwater remediation in the context of environmental economics protection and preservation The Economics of Groundwater Remediation and Protection is also an excellent introduction to innovative solutions for funding remediation projects education and incentive programs such as mitigation banking land pollution credit schemes and conservation credit alternatives      **The British National Bibliography** Arthur James Wells,2005      **Budget Support Versus Project Aid** Mr.Tito Cordella,Mr.Giovanni Dell'Ariceia,2003-04-01 Should donors who are interested in the effectiveness of developmental programs rely on conditional budget support or on project aid To answer this question we present a model in which only a subset of the developmental

expenditures can be subject to conditionality We show that budget support is preferable to project aid when donors and recipients preferences are aligned and when assistance is small relative to recipients resources Then we test our model estimating a modified growth model for a panel of developing countries and find evidence in support of our predictions
