Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment. It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries. Divided into two parts, the book first deals with general overarching themes and issues before applying these to more specific country case studies. The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries.

New Worlds of Work Ulrich Jürgens, Martin Krzywdzinski, 2016-04-15. New industrial centres are emerging in the so-called BRIC countries: Brazil, Russia, India and China, where large numbers of plants have been constructed in recent years, creating many manufacturing jobs. But what does industrial work look like in these locations? Up until now, much of the interest in developing country industrialization has concentrated on the poor working conditions that characterize some export-oriented sectors in emerging economies, most notoriously in the garment industry. In contrast, the concern of this book is with the modern facilities of multinational or local manufacturers that reflect aspirations for a process of industrial upgrading that might foreshadow the future for these countries. The book provides an analysis of work, its context, and the situation of employees in plants in the BRICs, focussing on three main questions: What differences and common features can be ascertained in a comparison both of countries and firms in terms of workplace HR management and production systems? What evidence is there for either a high road or low road developmental path in the BRICs? How are corporate standards implemented in these local contexts? The book addresses an academic audience as well as managers and trade unionists. For the former, it offers a systematic comparison of the four countries and the companies under study. For the latter, it offers a vivid account of challenges the companies face in the BRIC countries as well as the solutions adopted by the companies.
