An Introduction to Ethonrobotics Judit Abdai, Adam Miklosi, 2024-09-27 This pioneering text explores the emerging discipline of ethorobotics which brings together the fields of animal behaviour and robotics It encourages closer collaboration between behavioural scientists and engineers to facilitate the creation of robots with a higher degree of functionality in animal human environments and to broaden understanding of animal behaviour in new and intriguing ways Utilising the knowledge of key ethologists and roboticists in the field today this book is divided into four major parts The first part is written for those with little or no background in the biology of animal behaviour particularly for those coming from an engineering background seeking an accessible introduction to the field and how it can be applied to robotic behaviour Topics include problem solving in animals social cognition and communication visual acoustic olfactory etc

The second part is an introduction to the basic construction of robots for non engineers and the possibilities offered by current technical achievements and their limitations to the study of animal behaviour The third part explores the core theme of ethorobotics the basic framework of the discipline the field s evolution and current topics including ethical considerations autonomy to living social robots The fourth and final chapter looks at ethorobotics in practice through key research projects which have had the biggest impact This is a ground breaking interdisciplinary text which will appeal to upper level undergraduates postgraduates and researchers focusing on animal behaviour and cognition as well as those undertaking courses in engineering social robotics biologically inspired robotics AI and human robot and animal robot interactions

Using the Biological Literature Diane Schmidt, 2014-04-14 The biological sciences cover a broad array of literature types from younger fields like molecular biology with its reliance on recent journal articles genomic databases and protocol manuals to classic fields such as taxonomy with its scattered literature found in monographs and journals from the past three centuries Using the Biological Literature A Practical Guide Fourth Edition is an annotated guide to selected resources in the biological sciences presenting a wide ranging list of important sources This completely revised edition contains numerous new resources and descriptions of all entries including textbooks The guide emphasizes current

materials in the English language and includes retrospective references for historical perspective and to provide access to the taxonomic literature It covers both print and electronic resources including monographs journals databases indexes and abstracting tools websites and associations providing users with listings of authoritative informational resources of both classical and recently published works With chapters devoted to each of the main fields in the basic biological sciences this book offers a guide to the best and most up to date resources in biology It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians The guide includes a supplementary website dedicated to keeping URLs of electronic and web based resources up to date a popular feature continued from the third edition

Canines Lauryn E. DeGreeff, Craig A. Schultz, 2022-01-30 Detection canines have been utilized throughout the world for over a century and while numerous attempts have been made to replicate the canine's ability to detect substances by mechanical means none has been as successful The olfactory system is a highly intricate and sophisticated design for chemical sensing and the olfactory capacity of many animals including canines is considered unmatched by machine due to not only their great sensitivity and superior selectivity but also their trainability and mobility These unique features have led to the use of such animals as whole animal biosensors Amplifying the benefits and diminishing the limitations of detection canines interdisciplinary research is crucial to understanding canine olfaction and detection and enhancing this powerful and complex detector The past 50 years have produced vast advancements in animal behavior training technology to develop canines into more proficient and reliable sensors while scientific research has provided tremendous support to help practitioners better understand how to utilize this powerful sensor This book assembles a diverse group of authors with expertise in a variety of fields relating to detection canines and the chemical sensing industry including both research and operational perspectives on detection canines It illustrates how science enhances our understanding of how canines are employed for solving some of the world's leading detection challenges

Mammalogy George A. Feldhamer, Lee C. Drickamer, Stephen H. Vessey, Joseph F. Merritt, Carey Krajewski, 2015-01-15 Reflecting the expertise and perspective of five leading mammalogists the fourth edition of *Mammalogy* Adaptation Diversity Ecology significantly updates taxonomy includes a new chapter on mammalian molecular phylogenetics and highlights several recently described species There are close to 5 500 species in the class Mammalia including the blue whale the largest animal that has ever lived and the pygmy shrew which weighs little more than a penny The functional diversity of mammals has allowed them to play critical roles in every ecosystem whether marine freshwater alpine tundra forest or desert Many mammal species are critically endangered and present complex conservation and management challenges This book touches on those challenges which are often precipitated by overharvesting and habitat loss as well as emerging threats such as the impact of wind turbines and white nose syndrome on bats and chronic wasting disease on deer Among the updates and additions to the fourth edition of *Mammalogy* are numerous new photos figures and cladograms over 4 200 references as

well as A completely new chapter on mammalian phylogeny and genomics Current taxonomy including major changes to orders suborders and superfamilies of bats and rodents An explanation of the recent inclusion of whales with terrestrial even-toed ungulates Updates on mammalian structural functional adaptations and fossil history recent advances in our understanding of phylogeny biogeography social behavior and ecology A discussion of two new orders and thirteen newly recognized extant families Reflections on the implications of climate change for mammals Thorough examinations of several recently described species including Durrell's vontsira *Salanoia durrelli* and the Laotian rock rat *Laonastes aenigmamus* An explanation of mammalian biomechanics such as that seen in lunge feeding of baleen whales Breakout boxes on unique aspects of mammals including the syntax of bat songs singing mice and why there are no green mammals unless we count algae-covered sloths Maintaining the accessible readable style for which Feldhamer and his coauthors are well known this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates

Brain, Consciousness, and God Daniel A. Helminiak, 2015-07-16 *Brain Consciousness and God* is a constructive critique of neuroscientific research on human consciousness and religious experience An adequate epistemology a theory of knowledge is needed to address this topic but today there exists no consensus on what human knowing means especially regarding nonmaterial realities Daniel A. Helminiak turns to twentieth-century theologian and philosopher Bernard Lonergan's breakthrough analysis of human consciousness and its implications for epistemology and philosophy of science Lucidly summarizing Lonergan's key ideas Helminiak applies them to questions about science psychology and religion Along with Lonergan eminent theorists in consciousness studies and neuroscience get deserved detailed attention Helminiak demonstrates the reality of the immaterial mind and addressing the Cartesian mind-body problem explains how body and mind could make up one being a person Human consciousness is presented not only as awareness of objects but also as self-presence the self-conscious experience of human subjectivity a spiritual reality Lonergan's analyses allow us to say exactly what spiritual means and it need have nothing to do with God

Advanced Optimization by Nature-Inspired Algorithms Omid Bozorg-Haddad, 2017-06-30 This book compiles presents and explains the most important meta-heuristic and evolutionary optimization algorithms whose successful performance has been proven in different fields of engineering and it includes application of these algorithms to important engineering optimization problems In addition this book guides readers to studies that have implemented these algorithms by providing a literature review on developments and applications of each algorithm This book is intended for students but can be used by researchers and professionals in the area of engineering optimization

Flight Ways Thom van Dooren, 2014-06-03 A leading figure in the emerging field of extinction studies Thom van Dooren puts philosophy into conversation with the natural sciences and his

ethnographic encounters to vivify the cultural and ethical significance of modern day extinctions Unlike other meditations on the subject *Flight Ways* incorporates the particularities of real animals and their worlds drawing philosophers natural scientists and general readers into the experience of living among and losing biodiversity Each chapter of *Flight Ways* focuses on a different species or group of birds North Pacific albatrosses Indian vultures an endangered colony of penguins in Australia Hawaiian crows and the iconic whooping cranes of North America Written in eloquent and moving prose the book takes stock of what is lost when a life form disappears from the world the wide ranging ramifications that ripple out to implicate a number of human and more than human others Van Dooren intimately explores what life is like for those who must live on the edge of extinction balanced between life and oblivion taking care of their young and grieving their dead He bolsters his studies with real life accounts from scientists and local communities at the forefront of these developments No longer abstract entities with Latin names these species become fully realized characters enmeshed in complex and precarious ways of life sparking our sense of curiosity concern and accountability toward others in a rapidly changing world

Sociobiology of Caviomorph Rodents Luis A. Ebensperger, Loren D. Hayes, 2016-02-18 Fully integrative approach to the sociobiology of caviomorph rodents Brings together research on social systems with that on epigenetic neuroendocrine and developmental mechanisms of social behavior Describes the social systems of many previously understudied caviomorph species identifying the fitness costs and benefits of social living in current day populations as well as quantified evolutionary patterns or trends Highlights potential parallels and differences with other animal models The British National Bibliography Arthur James Wells, 2009 **Verbal Art Across Cultures** Hubert Knoblauch, Helga Kotthoff, 2001

Handbook of Ethological Methods Philip N. Lehner, 1998-04-16 At first glance studying behavior is easy but as every budding ethologist quickly realises there are a host of complex practical methodological and analytical problems to solve before designing and conducting the study How do you choose which species or which behavior to study What equipment will you need to observe and record behavior successfully How do you record data in the dark in the wet or without missing part of the action How do you analyse and interpret the data to yield meaningful information This new expanded edition of the *Handbook of Ethological Methods* provides a complete step by step introduction to ethological methods from topic choice and behavioral description to data collection and statistical analysis This book will be a must for beginning students and experienced researchers studying animal behavior in the field or laboratory
