Understanding the HighScope Approach Monica Wiltshire, 2013-03 Understanding the HighScope Approach is a much needed source of information for those wishing to extend and consolidate their understanding of the HighScope Approach. It will enable the reader to analyse the essential elements of the HighScope Approach to early childhood and its relationship to quality early years practice. Exploring all areas of the curriculum including the learning environment, plan do review, adult-child interaction and assessment, this book describes the key principles of the HighScope approach to early childhood with examples from HighScope settings. It provides students and practitioners with the relevant information about a key pedagogical influence on high quality early years practice in the United Kingdom, highlights the key ideas that practitioners should consider when reviewing and reflecting on their own practice, can be used as the basis for continuing professional development and action research. Written to support the work of all those in the field of early years education and childcare, this is a vital text for students, early years and childcare practitioners, teachers, early years professionals, children's centre professionals, lecturers, advisory teachers, head teachers and setting managers. [International Perspectives on Early Childhood Education and Care](#) Jan Georgeson, Jane Payler, 2013-02-16 There is a growing interest in understanding how early years care and education is organised and experienced internationally. This book examines key influential approaches to early years care as well as some less well known systems from around the world. In particular, the book aims to inform those studying early years about perspectives in other countries, encourage critical thinking about issues, influences and the complexities of early years provision around the world, promote critical reflection on students' own provision and the current context of that provision. Each chapter provides an overview of early years provision and explores historical and current influences in context as well as offering insights into daily life through short vignettes, longer case studies and commentary from practitioners. Whilst many approaches such as Reggio Emilia, Te Whāriki and Head Start are widely admired, it is important for reflective practitioners to understand the motivation which gave rise to these influential approaches in their original context. Additionally, broadening understanding through information on less widely known systems, the book provides students with a good grounding in the international context of early years, the provenance of different early years approaches and principles and the influences on their own country's provision. Written in a straightforward and accessible style, the book is designed to meet the needs of students studying modules related to international perspectives on a range of foundation, bachelor and master's degrees in early years. Contributors: Verity Campbell, Barr Federica, Caruso Carmen, Dalli Rebecca, Carter Dillon, Annie Davy, Chandrika Devarakonda, Alena Drzalov, Hasina Banu, Ebrahim Susan, Edwards Dora, Ho Valerie, Huggins Anne, Hunt Kerstin, Kpva Kovcsn, Bakoski, Caroline Leeson.
