

## **Nursing Case Study**

### **I. Health History**

The subject of my case study is W. K. W.K. is a 95 year old white male who was admitted to Moses Cone Hospital on November 23, 2002. Prior to being admitted to the hospital, W. K. had been in excellent health. His troubles apparently began three weeks prior to being admitted. On November 23, W. K.'s son found him lying on the floor confused, and soaked in urine.

Mr. K. was diagnosed as having an acute cerebral vascular accident. This disorder can also be described as a "stroke". It occurs when there is an interruption of normal blood flow in one or more of the blood vessels that supply the brain. Thrombosis, embolism, and hemorrhage are the primary causes of a CVA. (Sommers and Johnson 2002) The tissues of the brain become ischemic, leading to hypoxia or anoxia with destruction or necrosis of the neurons, glia, and vasculature. Complications of CVA include unstable blood pressure, sensory and motor impairment, infection, pneumonia, contractures, and pulmonary emboli. CVA is the third leading cause of death in the United States and affects more than 500,000 Americans annually. (Sommers and Johnson 2002)

He was widowed in October of 2001, one daughter has coronary artery disease, one son died of an MI at age 37, and one son died with lung cancer at 57. He had been the primary care giver of his daughter until she was admitted to the hospital three weeks ago. She is dying with a short bowel syndrome and cirrhosis and is now being taken care of in hospice. Soon after being left alone, Mr. K.'s appetite decreased and he had become congested. He was placed on Paxil to treat symptoms of depression. He had also been taking Cipro for congestion. Also his family noticed that he was suffering from confusion. As a result, they brought him into the Emergency Room for evaluation. The Emergency Room doctors performed a CT scan of the brain which revealed evidence of old strokes. The doctors

and informative resource provides a definitive base of information for those engaged in clinical inquiry. It not only presents the information in a systematic format; it also provides specific examples of projects that have been completed by advanced practice nurses. Score 100 5 Stars Doody's Medical Reviews. This one-of-a-kind resource is specifically designed to guide DNP students in the essentials of conducting practice-based studies. It demystifies the process by helping students to identify the methodology that best fits their project idea, envision the key elements of the project design, set up and run the project, and write up and disseminate the project outcome. In addition to being substantially updated throughout the second edition, it includes four new chapters and reflects current literature with updated references and suggested readings. Additionally, each chapter concludes with a Discussion Guide to assist faculty in pinpointing key points within the chapter. The only book to address the complexities of clinical inquiry from a practice perspective rather than a research perspective, the book builds on basic research concepts that combined with the knowledge and experience gained by the APRN student facilitate an in-depth understanding of how clinical research differs from traditional quantitative research. Packed with practical steps and tools, the book fosters the development of such skills as finding data and reading, critiquing, and translating research to support evidenced-based practice within the health care system, either with a specific population or for policy development. The text is based on the Scholarship of Integration and Application, one of the core DNP competencies, and is organized to build from simple to greater complexity. Each chapter features learning objectives, learning activities, and review questions. New to the Second Edition: Substantially updates all chapters. Includes four new chapters: The DNP Project, Finding and Critiquing the Best Evidence, Descriptive Projects, and Disseminating Results. New content reflects current literature. Offers updated references and suggested readings. Chapters conclude with a Discussion Guide to aid faculty and students to identify and explore key points. Key Features: Delivers clear, essential guidance for clinical inquiry and research used to demonstrate practice outcomes. Written by an esteemed educator highly experienced in teaching clinical inquiry. Illustrates the application of Scholarship of Integration and Application, a core competency for the DNP. Guides readers in DNP student program project design and evaluation. Presents content systematically from simple to complex.

**Case Study Research in Practice** Helen Simons, 2009-03-18. Case Study Research in Practice explores the theory and practice of case study research. Helen Simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design, conduct, and communicate case study research. It addresses questions often raised by students and common misconceptions about case research. In four sections, the book covers: Rationale, concept, and design of case study research; Methods, ethics, and reflexivity in case study; Interpreting, analyzing, and reporting the case; Generalizing and theorizing in case study research. Rich with tales from the field and summary memos as an aide-memoire to future action, the book provides fresh insights and challenges for researchers to guide their practice of case study research. This is an ideal text for those studying and conducting case study research in education, health, and social care and related social science disciplines.

**Mastering Healthcare Regulation: A Comprehensive Case Study Approach** Jessica Holmes, Robin J. Lunge, Betty Rambur, 2024-04-30 Trying to make sense of the regulatory landscape in healthcare can be difficult The many federal and state entities and their rules may work together yet they sometimes contradict one another Mastering Healthcare Regulation will help readers understand and ultimately navigate the numerous layers of regulatory oversight within the healthcare system This book clarifies laws and regulations with straightforward explanations and case studies that place readers in the shoes of regulatory decision makers The first section presents an overview of healthcare regulation including market dynamics and the interactions between the various regulatory organizations Each section that follows focuses on a broad subject that regulations seek to address cost containment consumer protection payment and delivery system reform and patient access health and safety Background is provided on each issue and real world scenarios are used to illustrate regulatory approaches and their economic legal and clinical ramifications The book will teach readers how to decipher the regulatory landscape s complexities and how to influence regulations rather than simply being impacted by them

Participatory Case Study Work Sion Williams, John Keady, 2021-01-03 Participatory Case Study Work shows academic co researchers how to adapt and implement their methods so that data collection and analysis is authentically participatory At the heart of this text is advocating a participatory approach to case study work with co construction as a catalyst for shared understanding and action in advancing ageing studies Whilst case study research has a relatively long tradition in the canon of research methodologies little attention has so far been paid to the importance and value of participatory case study work

This is surprising as its egalitarian and democratic value base naturally lends itself to the co production and co creation of personal and collective theory drawn directly from lived experience The book brings together over 15 years worth of participatory case study work in ageing studies in which the editors have been actively involved as either front line researchers or as supervisors to PhD and MPhil studies adopting the methodology and from where each of the contributors is selected Real life case examples are shared in the main chapters of the book and they provide direction as to how learning can be applied to other settings The chapters also contain key references and recommended reading This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as research methods qualitative methods ageing studies and mental health studies
