Anticipation and the control of voluntary action Dorit Wenke, Rico Fischer, A major hallmark in the adaptive control of voluntary action is the ability to anticipate short and long term future events Anticipation in its various forms is an important prerequisite for higher order cognitive abilities such as planning reasoning and the pursuit of both immediate goals and long term goals that may even stand in opposition to immediate desires and needs e g to invest in pension funds Therefore it is not surprising that diverse and rather independent research lines have evolved all somehow targeting various
