us toward the idea that students experience a curriculum through their degree progress in an academic program. Consequently we needed to map the writing assignments according to how different departments organized these degree programs. Results that were organized by curricular unit, departments, faculties, or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree. Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university. The last two chapters report on the instructors' perspective on their assignments, what they were intending to do, and why they both resisted and engaged in curricular discussions.
