The Education Invasion Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation's schools Who benefits And how can citizens regain local self governance in education so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies

Advances in Hydrologic Forecasts and Water

Resources Management Fi-John Chang, Shenglian Guo, 2021-01-20 The impacts of climate change on water resource management as well as increasingly severe natural disasters over the last decades have caught global attention. Reliable and accurate hydrological forecasts are essential for efficient water resource management and the mitigation of natural disasters. While the notorious nonlinear hydrological processes make accurate forecasts a very challenging task, it requires advanced techniques to build accurate forecast models and reliable management systems. One of the newest techniques for modeling complex systems is artificial intelligence (AI). AI can replicate the way humans learn and has great capability to efficiently extract crucial information from large amounts of data to solve complex problems. The fourteen research papers published in this Special Issue contribute significantly to the uncertainty assessment of operational hydrologic forecasting under changing environmental conditions and the promotion of water resources management by using the latest advanced techniques such as AI techniques. The fourteen contributions across four major research areas: 1. machine learning approaches to hydrologic forecasting; 2. uncertainty analysis and assessment on hydrological modeling under changing environments; 3. AI techniques for optimizing multi-objective reservoir operation; 4. adaption strategies of extreme hydrological events for hazard mitigation. The papers published in this issue will not only advance water sciences but also help policymakers to achieve more sustainable and effective water resource management.

Crimes of the Educators Samuel Blumenfeld, Alex

Newman, 2025-01-17 Utopian dictators like Stalin, Hitler, Pol Pot, and Mao are criminals, genocidal psychopaths who have killed more human beings in the last hundred years than any other ideologues in history. They don't limit their murder to individuals but to entire nations. In the United States, another form of utopians, the progressives have tried to destroy traditional America by strategically dumbing down her people. America's future is being crippled on purpose in order to fundamentally transform the nation, its values, and its system of government. Laid out a century ago by progressive luminary John Dewey, the fruits of his schemes are plain to see today. Dewey got rid of the traditional intensive phonics method of instruction and imposed a look-say-sight or whole word method that forces children to read English as if it were Chinese. The method is widely used in today's public schools, which is a major reason there are so many failing public schools that cannot teach children the basics. This can only be considered a blatant form of child abuse. American author and veteran educator Samuel Blumenfeld and journalist Alex Newman have taken on the public education establishment as never before and exposed it for the de facto criminal enterprise it is. *Crimes of the Educators* reveals how the architects of America's public school disaster implemented a plan to socialize the United States by knowingly and willingly dumbing down the population, a mission closer to success than ever as the Obama administration works relentlessly to nationalize K-12 schooling with Common Core. The whole word method of teaching children to read, introduced by John Dewey and colleagues in the early twentieth century and which permeates Common Core, is a significant cause of dyslexia among students. Public education's

war against religion the great American math disaster promotion of death education and the government's plan to lower standards for all so no one is left behind is destroying the logic reasoning and overall educational prowess of America's next generation According to the Program for International Student Assessment which collects test results from 65 countries for its rankings In reading students in 19 other locales scored higher than U.S. students In science 22 education systems scored above the U.S. In mathematics 29 nations and other jurisdictions outperformed the United States Journalist Henry Mencken said it best in 1924 when he wrote that the aim of public education is to reduce as many individuals as possible to the same safe level to breed and train a standardized citizenry to put down dissent and originality It is time to hold the Department of Education accountable for the crimes of the educators
