Meade 505 Connector Cable Set User Guide:

How to Use a Computerized Telescope Michael A. Covington, 2002-09-26 *How to Use a Computerized Telescope* is the first handbook that describes how to get your computerized telescope up and running and how to embark on a program of observation. It explains in detail how the sky moves, how your telescope tracks it, and how to get the most out of any computerized telescope. Packed full of practical advice and tips for troubleshooting, it translates the manufacturers' technical jargon into easy-to-follow step-by-step instructions and includes many of the author's tried and tested observing techniques.

Using the Meade ETX Mike Weasner, 2012-12-06 The Meade ETX range of telescopes is one of the most successful ever made. It is low cost, has sold in its tens of thousands, and is available in almost every country. Here ETX expert Mike Weasner reveals everything any amateur astronomer ever wanted to know about the telescope. First book dedicated entirely to the ETX. Written by an acknowledged world authority. Describes the best 100 objects to begin observing. Contains detailed hints and tips aimed at getting the best out of the ETX. Features imaging, photographic and digital as well as visual observing.

Astronomy with Small Telescopes Stephen Tonkin, 2012-12-06 Small telescopes have a lot to recommend them. Cost is, of course, a consideration, but their most positive feature is sheer portability. Some manufacturers have tried to make large telescopes more portable with mixed success, but the opposite approach, that of making small telescopes more effective, is what this book is all about. Good 2-inch 60mm telescopes are now available for beginners, and major American manufacturers now offer small, affordable, computer-controlled instruments that are capable of superb results. Stephen Tonkin has gathered the experience of users of small telescopes to provide an insight into just what is possible for newcomers to astronomy or experienced observers who simply want to use a small, really portable telescope. *Mercury*, 2002 *Astronomy Now*, 2005
