

7.

Figure 5

Figure 5 shows two particles A and B , of mass $2m$ and $4m$ respectively, connected by a light inextensible string. Initially A is held at rest on a rough inclined plane which is fixed to horizontal ground. The plane is inclined to the horizontal at an angle α , where $\tan \alpha = \frac{3}{4}$. The coefficient of friction between A and the plane is $\frac{1}{4}$. The string passes over a small smooth pulley P which is fixed at the top of the plane. The part of the string from A to P is parallel to a line of greatest slope of the plane and B hangs vertically below P . The system is released from rest with the string taut, with A at the point X and with B at a height h above the ground.

For the motion until B hits the ground,

(a) give a reason why the magnitudes of the accelerations of the two particles are the same, (1)

(b) write down an equation of motion for each particle, (4)

(c) find the acceleration of each particle. (5)

Particle B does not rebound when it hits the ground and A continues moving up the plane towards P . Given that A comes to rest at the point Y , without reaching P ,

(d) find the distance XY in terms of h . (6)

Mechanics Edexcel January 2014 Question Paper

Albert A Gayle

Mechanics Edexcel January 2014 Question Paper:

Yeah, reviewing a ebook **Mechanics Edexcel January 2014 Question Paper** could go to your near friends listings. This is just one of the solutions for you to be successful. As understood, completion does not recommend that you have extraordinary points.

Comprehending as without difficulty as concord even more than new will manage to pay for each success. adjacent to, the declaration as capably as perspicacity of this Mechanics Edexcel January 2014 Question Paper can be taken as skillfully as picked to act.
