

The wildfire hazard potential (WHP) map is a raster geospatial product that can help to assess variations of wildfire risk at projections of fuels management levels across very large spatial scales. The specific objective of the WHP map is to depict the relative potential for wildfire that would be difficult for managers to measure. This 2020 version is based on landscape conditions at the end of 2019 and wildfire conditions resulting from temperatures a wide range of possible weather scenarios.

The WHP map is a product of the USDA Forest Service, Fire Planning Institute. For more information, see:
