

4. How did Victor feel about his parents and childhood?
5. Victor acknowledged that his "temper was sometimes violent" and his "passions vehement," but he wanted to make clear that he wasn't focused on "childish pursuits." What interested him?

Historical context: Victor recalled how, when his family had to stay inside on a rainy day during their vacation, he discovered a book by Cornelius Agrippa. Agrippa (1486–1535) was a German polymath someone who explored various subjects and disciplines. He is best known for trying to use a combination of magic and religion to understand the world. After discovering Agrippa, Victor continued to read the works of scholars who lived hundreds of years earlier. Paracelsus (1493–1541) explored alchemy, which was a medieval forerunner of chemistry. Alchemists engaged in quests like finding an elixir for immortality and a "philosopher's stone" that would transform inexpensive metals into gold. However, Paracelsus, along with alchemist Magnus (1150–1280) also contributed valuable ideas to science that are now commonplace, like conducting experiments and having medical diagnoses or observation instead of speculating about supernatural causes.

6. What was Victor inspired to discover?
7. What else did Victor hope he could discover, based on "a promise liberally provided by my favourite authors?"

8. What "accident again changed the current" of Victor's studies? (Note the double meaning of the word "current.")
9. What did Victor do after a visitor explained his theory of electricity and galvanism (i.e. the generation of electric current within biological organisms)?

Chapter 2 Discussion
