Dutrow,2007-02-20 First published in 1848 authored by J D Dana the Manual of Mineral Science now enters its 23rd edition  
This new edition continues in the footsteps of its predecessors as the standard textbook in Mineralogy Mineral Science Earth  
Materials Rocks and Minerals courses This new edition contains 22 chapters instead of 14 as in the prior edition This is the  
result of having packaged coherent subject matter into smaller more easily accessible units Each chapter has a new and  
expanded introductory statement which gives the user a quick overview of what is to come Just before these introductions  
each chapter features a new illustration that highlights some aspect of the subject in that particular chapter All such changes  
make the text more readable user friendly and searchable Many of the first 14 chapters are reasonably independent of each  
other allowing for great flexibility in an instructor's preferred subject sequence The majority of illustrations in this edition  
were re-rendered and/or redesigned and many new photographs mainly of mineral specimens were added NEW Thoroughly
