Looijen, 2012-12-06 Holism and reductionism are traditionally seen as incompatible views or approaches to nature Here Looijen argues that they should rather be seen as mutually dependent and hence co operating research programmes He sheds some interesting new light on the emergence thesis its relation to the reduction thesis and on the role and status of functional explanations in biology He discusses several examples of reduction in both biology and ecology showing the mutual dependence of holistic and reductionist research programmes Ecologists are offered separate chapters clarifying some major yet highly and
