The Complete Idiot's Guide to JavaServer Pages
 Robert Brunner, 2002 Presents a clear comprehensible approach to JSP technology and its applications. The Complete Idiot's Guide RM to JavaServer Pages presents JSP in a way that is understandable to both the budding Web developer/familiarity with Java programmer or a Web designer who's better acquainted with HTML than Servlets. JSP though efficient and very applicable relies on Java concepts. This makes learning JSP initially less intuitive than similar scripting protocols. Hence neophytes to this technology could benefit greatly from a Complete Idiot's Guide RM that explains its fundamentals. This book will provide instructions for creating a JSP application through helping the reader get up and

running on the free Jakarta tomcat server This book is designed to gently guide the reader thorough the intricacies of JavaServer Pages JSP First a basic understanding of the HTTP model and the Servlet lifecycle are presented as these are key requisites for understanding and implementing JSPs Following this the reader is guided through an installation of the Apache software foundation tomcat server which is the JSP reference implementation and is free Several demo JSPs come with this server which will be used to visually demonstrate the JSP concept Sams Teach Yourself JavaServer Pages 2.0 with Apache Tomcat in 24 Hours Mark Wutka,Alan Moffet,Kunal Mittal,2004 The Compact Framework brings familiar NET development to mobile devices This technology enables millions of Microsoft programmers to develop Windows CE applications Written by two Microsoft Compact Framework team members **Object-Orientation, Abstraction, and Data Structures Using Scala, Second Edition** Mark C. Multi-Agent System Engineering Francisco J. Garijo,Magnus Boman,2007-07-23 In the ten years since the first MAAMAW was held in 1989 at King s College Cambridge the field of Multi Agent Systems MAS has flourished It has attracted an increasing amount of theoretical and applied research During this decade important efforts have been made to establish the scientific and technical foundations of MAS MAAMAW publications are testimony to the progress achieved in key areas such as agent modelling and reasoning multi agent interaction and communication and multi agent organisation and social structure Research results have covered a wide range of inter related topics in each area including agent architectures reasoning models logics conflict resolution negotiation resource allocation load balancing learning social behaviour and interaction languages and protocols interagent and agent human communication social models agent roles

norms and social laws and static and dynamic organisational structures The feasibility and the viability of the proposed models and techniques have been demonstrated through MAS applications in heterogeneous domains including electronic commerce co operative work telecommunications social and biological systems robotics office and business automation public administration social simulations and banking As the applicability of the technology became understood the multi agent paradigm has been progressively accepted by product managers and system developers giving rise to a considerable amount of business expectation from industry These expectations do not rest on the concept or metaphor of agent but on the development of MAS useful in an industrial setting with real time systems presenting the biggest challenge
