## Jsc Syllabus 2015:

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process. It is comprised of two main parts: i) a technical understanding of public budgets including familiarity with government spending, tax rates and public debt, and ii) the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply side actors in the budget process (governments) simplify and disseminate budget information for demand side actors (citizens), this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes, one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth, helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development, improvement or scaling up of budget literacy initiatives.

The Political Economy of Education in South Asia John Richards, Manzoor Ahmed, Md. Shahidul Islam, 2021-12-23 With the exception of Sri Lanka, South Asian countries have not achieved quality basic education, an essential measure for escaping poverty, inequality and social exclusion. In *The Political Economy of Education in South Asia*, John Richards, Manzoor Ahmed and Shahidul Islam emphasize the importance of a dynamic system for education policy. *The Political Economy of Education in South Asia* documents the weak core competency reading and math outcomes in government primary schools in India, Pakistan, Bangladesh and Nepal, and the consequent rapid growth of non government schools over the last two decades. It compares the training, hiring and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland. Discussing reform options, it makes the case public good and public priorities are better served when both public and non government providers come under a strong public policy and accountability framework. *The Political Economy of Education in South Asia* draws on the authors' broad engagement in education research and practice in South Asia, as well as analysis by prominent professors of education and NGO leaders, to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth.
