Race, Class and Education (RLE Edu L) Len Barton, Stephen Walker, 2012-05-04 One problem which continues to absorb social scientists is the way in which so much social deprivation stems from racial or class status The discussion in this book is developed in two ways firstly careful attention is given to an examination of the way minority groups create and maintain collective identities and action Secondly the relationship between this movement and such topics as racism in schools schooling unemployment and West Indian involvement in sporting rather than academic activities is analysed together with the nature of the educational experience of different class and gender groups *Holt Science and Technology* Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2001

Embodying the Social Esther Saraga, 2005-08-17 This book opens the series with a consideration of the social construction of social difference Taking the body as the point of departure it deals with the processes through which social problems and social inequalities are constructed In particular it examines the shifting ways in which our ideas about issues such as disability race and ethnicity and sexuality influence the development of social policies

Memory and Cognition in Its Social Context Robert S. Wyer, Jr., Thomas K. Srull, 2014-02-04 The first comprehensive theoretical formulation of the way people use information they receive about their social environments to make judgments and behavioral decisions this volume focuses on the cognitive processes that underlie the use of social information These include initial interpretation the representations used to make inferences and the transformation of these subjective inferences into overt judgment and behavior In addition it specifies the role of affect and emotion in information processing and the role of self knowledge at different stages of processing The theoretical model presented here is the first to provide a conceptual integration of existing theory and research in all phases of social information processing It not only accounts for the major portion of existing research findings but permits several hypotheses to be generated concerning phenomena that have not yet been empirically investigated Although focused here on the processing of information about people and events the formulation proposed has implications for other domains such as personnel appraisal political decision making and consumer behavior AETS Yearbook ,1979
