Tools for Teaching Conceptual Understanding, Secondary Julie Stern, Krista Ferraro, Juliet Mohnkern, 2017-02-02

Students become experts and innovators through Concept Based teaching Innovators don't invent without a deep understanding of how the world works With this foundation they apply conceptual understanding to solve new problems We want our students to not only retain ideas but relate them to other things they encounter using each new situation to add nuance and sophistication to their thinking To do this they need conceptual understanding This book serves as a road map for Concept Based teaching Discover how to help students uncover conceptual relationships and transfer them to new situations Specifically teachers will learn Strategies for introducing conceptual learning to students Four lesson frameworks to help students uncover conceptual relationships How to assess conceptual understanding and How to differentiate concept based instruction Look no further For deep learning and innovative thinking this book is the place to start The authors tear down the false dichotomies of traditional vs innovative education and provide a practical toolkit for developing creativity and applying knowledge through Concept Based learning Every practitioner needs this book to juxtapose what worked well in the 20th Century with what is essential in the 21st Century and beyond Michael McDowell Superintendent Ross School District Ross CA While most good educators recognise the incredible value of teaching conceptually it is challenging The authors have created accessible practical baby steps for every teacher to use Dr Vincent Chan principal Fairview International School Kuala Lumpur Malaysia

Becoming the News Ruth Palmer, 2017-12-05 What does it feel like to be featured quoted or

just named in a news story A refugee family the survivor of a shooting a primary voter in Iowa the views and experiences of ordinary people are an important component of journalism While much has been written about how journalists work and gather stories what do we discover about the practice of journalism and attitudes about the media by focusing on the experiences of the subjects themselves In *Becoming the News* Ruth Palmer argues that understanding the motivations and experiences of those who have been featured in news stories voluntarily or not sheds new light on the practice of journalism and the importance many continue to place on the role of the mainstream media Based on dozens of interviews with news subjects *Becoming the News* studies how ordinary people make sense of their experience as media subjects Palmer charts the arc of the experience of making the news from the events that brought an ordinary person to journalists attention through the decision to cooperate with reporters interactions with journalists and reactions to the news coverage and its aftermath She explores what motivates someone to talk to the press whether they consider the potential risks the power dynamics between a journalist and their subject their expectations about the motivations of journalists and the influence of social media on their decisions and reception Pointing to the ways traditional news organizations both continue to hold on to and are losing their authority *Becoming the News* has important implications for how we think about the production and consumption of news at a time when Americans distrust the news media more than ever
