Business-critical 2U server packed with innovation

Suggested Uses: All sectors requiring highly available, energy-efficient, rack-optimized solution for physical and virtual internet commercial environments and eBusiness/eCommerce, collaboration, virtualization, databases, and enterprise resource planning applications.

Your challenge is to do more with less—serve more Web pages, handle more secure connections, support more e-mail users. This need to reduce the costs of doing business and improve the service you deliver to your customers while lowering your overall risk. The **dual-socket IBM® System x3650 M3** can reduce your costs with its new energy-smart design. It can improve service with reduced operational complexity and increased management functionality. It will lower your IT risk with the resiliency that comes from no single point of failure. And like all IBM servers, the x3650 M3 offers you the trust that comes from the IBM global reach, service and support.

The x3650 M3 is a game-changing rack server that uses significantly less power than previous generations, with unified systems management tools, leadership reliability, availability, serviceability features and smart system flexibility. Housed in a compact 2U mechanical package.

The x3650 M3 features Intel® Xeon® 5500 series E5506 and E5508 processors, with up to 12MB of shared L2 cache, to provide you with the computing power you need to match your business needs and growth. The new line of Intel processors delivers unprecedented intelligent performance with features like adaptive performance for applications and environments, Turbo Boost Technology and Hyper-Threading Technology, and integrated power gates and automated power management.

The x3650 M3 supports up to 16 DIMMs, 1 TB DDR3 or PCDDR3 1333MHz DDR3 memory (or up to 1.2 TB DDR3), 4 TB of UDIMM memory and provides **Onboard BMC (Base Board Controller and Controller) protection**—for high performance and reliability. For even higher levels of availability, the x3650 M3 also offers **server mirroring**. Up to 4 integrated high-speed **Quad Ethernet** controllers are available (offering 10G (10Gbps) Ethernet) support on **Microsoft Windows® 7**, as are four high-performance adapter slots (PCIe x8). The x3650 M3 offers an optional **embedded hypervisor** to manage your virtual workloads.

The System x3650 M3 supports up to 16 high-performance hot-swap HDDs with an internal storage capacity of **16 TB** (3.5-inch hot-swap **Serial-Attached SCSI (SAS)** or **Serial-Attached ATA (SATA)** drives). Alternatively, up to 16 **ultra-wide drives (UWDs)** are also available to keep power low, improve resiliency, and offer up to 800,000 of storage. To address your backup needs, up to **eight HDDs** or **SSDs** and one internal tape drive or removable disk cartridge drive can be used. The server includes a choice of several **IBM StorageLife®** storage controllers that provide broad levels of high-performance **SAS solutions**. This ultra-dense 2U form factor offers businesses to increase their computing power and spread their workload without outgrowing their current data center. Up to 24 of these 2U servers can be installed in a single 42U rack, for a total of up to 432 processors and 288 processor cores, offering tremendous deployment flexibility.

Standard in the x3650 M3 is the **Integrated Management Module (IMM)** that enables the user to manage and control the server easily—both locally and remotely. In conjunction with the IMM, the x3650 M3 comes with a **Smart (SMB) Active Sensor (SMBAS)** that governs fan rotation based on altitude, to help lower your energy consumption. The IMM offers a high level of manageability that is designed to keep costs down and the system up—even when network usage increases. IBM's innovative pre-built-in **light path diagnostics** can enable quick servicing of the system if a problem develops. These advanced features, plus maximum network availability for networking options, as its hot-swap **SAS/SATA** drive, **hot-swap/redundant SAS or SATA HDDs**, redundant ultra-efficient power supplies and fan modules, **Active Memory**, integrated **SAS**, **temperature-controlled fans**, with **Controlled Ventilated Cooling™ (CVC)** 2.0 system, including **highly secure remote power control** and **Serial over LAN**, as well as **high-speed network over LAN**.

¹ Available (Q4 2011).

Ibm System X365user Guide:

Embracing the Melody of Phrase: An Mental Symphony within **Ibm System X365user Guide**

In a global consumed by displays and the ceaseless chatter of immediate communication, the melodic splendor and psychological symphony developed by the published word often diminish in to the background, eclipsed by the constant sound and distractions that permeate our lives. However, nestled within the pages of **Ibm System X365user Guide** a stunning fictional treasure full of organic feelings, lies an immersive symphony waiting to be embraced. Constructed by an elegant musician of language, that interesting masterpiece conducts visitors on a psychological journey, well unraveling the concealed songs and profound affect resonating within each cautiously crafted phrase. Within the depths of this poignant examination, we will discover the book is central harmonies, analyze their enthralling publishing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
