IBM Sterling Gentran:Server for Windows

Handle your business transactions with a premier e-business platform

Executive summary

IBM® Sterling Gentran:Server® for Microsoft® Windows is a versatile, high performance e-business solution, designed to assist with the exchange of EDI and other types of data. IBM® Sterling Gentran® consists of several logical components: a data store, process, communication controllers, and user interface clients. Sterling Gentran is a point product intended to address one need – the translation of inbound and outbound B2B files and messages.

The pressure to succeed is mounting

Decision makers, like you, are facing increasing demands to lower costs, improve quality of service, and maintain competitive excellence. As your company evolves, there is a constant need to keep up with technology, standards, and processes.

Of course, there are also some practical issues to consider: How important is it to be technologically savvy, but unable to deploy systems effectively? What is the benefit of being the standards bearer if you cannot communicate with suppliers? What good is it to have processes in place if they prevent you from conducting business effectively?

IBM offers a powerful and flexible e-business solution that has been a benchmark for business-to-business commerce for over 30 years. In addition, IBM continues to help enterprises address their business needs and the needs of their partners.

IBM delivers solutions that meet your distinct business challenges. IBM provides a mix of software, service and support that helps enable your company to rapidly integrate and deploy business processes – within your organization and with your external business partners – so you can lower costs, provide excellent customer service, sharpen efficiencies, and strengthen your competitive advantage.
