

# Manual Calculation of Virtualization Capacity – Rules

## For Single Server Environments:

License Rules for a partition, shared pools and micro-partitioning for each product:

- ▶ for a Dedicated LPAR, the highest\* number of cores allocated to the LPAR
- ▶ for a Capped Partition, the highest\* amount of Entitled Capacity (EC)
- ▶ for a Uncapped Partition, the highest\* amount of Online VP (Virtual Processor Cores)

*\*The greater of what the partition starts with or the result of a DLPAR operation (in whole cores)*

The PVU licensing requirement is based on the maximum number of virtual processor cores in the partitions available to a product (lower of the sum of the virtual cores or the server capacity)

If you want to use sub-capacity licensing for any other PowerVM technology, including shared processor pool, you must use the ILMT tool
