**Islam, Modernity and a New Millennium** Ali Paya, 2018-02-02 As the world becomes increasingly globalised Islam faces some important choices Does it seek to modernise in line with the cultures in which it is practised or does it retain its traditions even if they are at odds with the surrounding society This book utilizes a critical rationalist viewpoint to illuminate many of the hotly contended issues in modern Islam and to offer a fresh analysis A variety of issues within Islam are discussed in this book including Muslims and modernity Islam Christianity and Judaism approaches to the understanding of the Quran Muslim identity and civil society doctrinal certainty and violent radicalism In each case the author makes use of Karl Popper's theory of critical rationalism to uncover new aspects of these issues and to challenge post modern relativist literalist and justificationist readings of Islam This is a unique perspective on contemporary Islam and as such will be of significant interest to scholars of Religious Studies Islamic Studies and the Philosophy of Religion

**AI and Cognitive Science '92** Kevin Ryan, Richard F.E. Sutcliffe, 2012-12-06 The annual Irish Conferences on Artificial Intelligence and Cognitive Science have become the major forum in Ireland for the discussion of various aspects of artificial intelligence Their aim is to provide a forum where researchers can present their current work and

where industrial and commercial users can relate this work to their own practical needs and experiences Although the emphasis of the conferences is on Irish research there are also important contributions from Europe Australia Canada and the USA This volume is based on the proceedings of the Fifth Irish Conference on Artificial Intelligence and Cognitive Science AICS 92 which was held at the University of Limerick Ireland from 10 11 September 1992 The conference was divided into 6 sessions covering knowledge representation cognitive foundations natural language 1 and 2 learning and expert systems and novel aspects of artificial intelligence and cognitive science Because of the high number of papers submitted to the conference a poster session was run in addition to the plenary sessions Each paper presented at the poster session is represented in this volume by a four page abstract Among the specific topics covered in this volume are a model based theory of conceptual combination the nature and development of reasoning strategies word recognition as a parsing problem a knowledge based autonomous vehicle system for emergency management support the construction and use of scope neutral discourse entities computer based iconic communication and exceptions in multiple inheritance systems AI and Cognitive Science 92 provides a comprehensive record of current research into this important field It will be of interest to researchers lecturers and postgraduate students in a variety of disciplines related to artificial intelligence and cognitive science

**Aircraft Fatigue Management** Lorrie Molent, 2023-12-18 Fatigue occurs under cyclic loading and can significantly degrade the operational capability and safety of metallic aircraft components and structures This book provides summaries of some metallic aircraft structural integrity issues innovative but established examples of maintaining operational capability airworthiness and assessments of safe in service fatigue lives These topics are based on a through life fatigue management philosophy that ensures safe and continued operation including during life extensions that are almost inevitably required This philosophy is underpinned by observations of the behaviour of fatigue cracks in actual structures subjected to realistic service loading conditions The book includes topics like aircraft design requirements individual aircraft fatigue loads monitoring airframe fatigue testing sources of fatigue nucleating discontinuities and prediction of fatigue crack growth from these discontinuities All these aspects contribute to discussing methods of assuring the structural integrity and operational capability of realistically cracked structures The book also discusses the exponential behaviour of lead or dominant cracks those leading to first failure and the practical significance of differences between fatigue fracture topographies produced under constant amplitude and variable amplitude loading The book can be a valuable reference for researchers and professionals interested in aircraft fatigue management and allied fields
