## About the backup battery

To keep good time, as a backup power source, this unit has an CR2032 battery inside of the remote commander in the future version.

## Knowing when to replace the battery

If a power interruption occurs when the battery is weak, the frequency of vibration in the display fluctuates. If the battery runs out during the alarm, the current time and alarm functions will be cancelled.

Replace the battery with a Sony CR2032 lithium battery. Two of similar battery may prevent a risk of fire or explosion.

## Replacing the backup battery

1. Keep the AC plug connected to the AC outlet, remove the screws that secure the battery compartment at the bottom of the unit using a screwdriver, and remove the battery compartment. (See Fig. 2-10)
2. Insert a new battery in the battery compartment with the (+) side facing up. To remove the battery from the battery compartment, push it out from the side marked PLUS. (See Fig. 2-10)
3. Insert the battery compartment back into the unit and secure it with the screws. (See Fig. 2-10)

### Note

\* When you replace the battery, keep the AC plug connected to a wall outlet. Otherwise, current time and alarm will be cancelled if the replacement is not completed within around one minute.

## If the time in the display is incorrect after the battery is changed (RESET)

Push the RESET switch with the pointed device. The RESET switch is on the small hole located in the battery compartment.

### Notes

- You cannot reset unless the lithium battery is installed.
- Set the clock again after the unit is reset.

## Preparing the remote commander

Before using the cord remote commander for the first time, remove the isolation film. (See Fig. 2-10)

## When to replace the battery

When control unit, the battery (CR2032) should last for about six months. When the remote commander no longer operates the unit, replace the battery with new ones. (See Fig. 2-10)

### Notes
