Inviting us on his personal journey he provides the reader in this book with an insight as to how he coaches using his own NLP model as well as exploring the complexity of NLP as a practice and why it tends to polarise opinion in today's coaching landscape. Grimley insists that if the NLP paradigm is to find credible traction in the modern world it needs to test its claims in the same way as other academic disciplines based on his own research this book does just that. Incorporating contemporary psychological understanding and neuroscientific research throughout it provides a complete NLP model outlining specific steps for the reader to follow in order to achieve excellence in coaching. It includes case studies exercises and reflective questions which will encourage both novice and advanced coaches to explore the benefits of NLP understanding and taking into account emotions and the unconscious mind in their practice. By analysing the NLP landscape this book also addresses many issues which are shared by the broader coaching community such as differentiation from counselling professional status and lack of a reliable empirical evidence base. Ground breaking and thought provoking this book offers a modern examination of NLP.
