The Role of IMF Arrangements in Restoring Access to International Capital Markets Joseph Kogan, Romina Kazandjian, Shijia Luo, Moustapha Mbohou, Hui Miao, 2024-08-09 Using a database of emerging market fundamentals and bond index spreads across 56 frontier and emerging market countries rated below investment grade during the period 2002 22 we assess whether IMF arrangements can restore access to international capital markets ICM for countries in distress through liquidity and conditionality channels We find that global financial conditions and debt GDP are the most important determinants of access to ICM within the horizon of a typical IMF

arrangement Using an event study methodology we show that spreads increase prior to the start of an IMF arrangement and then decrease gradually By exploiting different characteristics of IMF arrangements we find evidence that the reforms implemented under the IMF arrangement as measured by rounds of successful IMF reviews matter more in the medium term than the IMF's role as a liquidity provider These results are consistent with our analysis of 55 credit rating upgrades to ICM access levels which suggests that debt reduction plays the largest role and that IMF arrangements lend credibility to reforms

Environmental Water Markets and Regulation Katherine Owens, 2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate
