Intentional Transformative Experiences Sarah Perez, Bastiaan van Rijn, Jens Schlieter, 2024-09-23 This book offers new theoretical insights into religious esoteric and philosophical practices and narratives that deal with intentional transformative experiences Exceptional life-changing experiences are often believed to be beyond the individual's control they are thought to simply happen However many individuals actively and self-reflectively search for transformative experiences Intentional Transformative Experiences provides analyses of such intentionally sought experiences in different spiritual religious and esoteric milieus Case studies range from South and Central Asian traditions to Western esoteric practices compare autobiographical narratives of self-cultivation and explore attempts to systematize intentional transformative experiences Next to applying established theoretical frameworks such as the cognitive science of religion and philosophy this volume also includes considerations on subsets of transformative experiences such as the dichotomy of intentionality and unintentionality risk and failure as well as the transformation of others instead of one's own self The result is an important contribution for researchers who deal with narratives or practices that include transformative experiences

The New Husserl Donn Welton, 2003-08-21 The recent first-time publication of works from Edmund Husserl's later years especially his Freiburg period combined with new studies of his method and theories has stimulated a

remarkable shift in perceptions of the scope and significance of Husserl's transcendental phenomenology. Informed by a deep reading of not just the works published during Husserl's lifetime but also the countless lectures and manuscripts he wrote in his later years, the essays in *The New Husserl* provide an alternative approach to Husserl by examining his work and his method as a whole and by probing issues old and new that occupied him during this exceptionally productive period. The noted Husserl specialist Klaus Held opens the book with two essays published here in English for the first time that provide an insightful and lucid introduction to Husserl's central texts. Other prominent Husserl scholars treat his most important and lasting contributions to philosophy such as the concept of intentionality, the theory of types, time, consciousness, consciousness and subjectivity, the phenomenological method, and the problem of generativity. By inviting readers to discover this new Husserl, the present collection is likely to shape scholarly discussions of Husserl's thought for some time to come.

Experience and Reason R.A. Mall, 2012-12-06 In this work the author has tried to present a brief exposition of the phenomenology of Husserl. In doing this he had in mind a two fold purpose. He wanted on the one hand to give a critical exposition, interpretation and appreciation of the most leading concepts of Husserlian phenomenology. On the other hand he tried to show that a true comprehensive understanding of Husserl's phenomenology culminates in his teaching of experience and reason. It is the strong conviction of the author that the central most teaching of Husserl's phenomenology is the discovery of the noetic-noematic correlativity. In the reduced realm of constituting intentionality the distinction between reason and experience seems to vanish and these two concepts become interchangeable terms. The present study suffers from one great limitation and this must be made clear right here in order to avoid any misconception about the author's intentions. The author has not discussed the other important theories of experience and reason. He has undertaken the humble task of giving an account of Husserl's phenomenology of experience and reason. The bringing in of Hume serves as would be clear in the course of the book a two fold purpose. It tries on the one hand to show the programmatic similarity between the philosophies of these two philosophers. On the other hand it implicitly maintains that the philosophical continuity from Hume to Husserl runs not so much via Kant but rather via Meinong, Brentano, Avenarius, James and so forth.

Darin R. Clements, 2025-04-28 I chose to publish my dissertation for two reasons First though quite narrow in scope as good qualitative research should be this research makes a modest contribution to the growing scholarship on Christianity in Cambodia Second this research makes an empirical contribution to the field of nonformal Christian Education from an Asian context in which Christians are a tiny minority As my literature review indicates the field of nonformal CE is dominated by a North American point of view which ironically is facing a general breakdown of historical CE institutions like Sunday school While much of the literature is useful in the Majority World it does not take into account the education levels educational contexts and social dynamics of places like Cambodia For example the findings from my cases indicate that nonformal CE in Cambodia has more in common with the Sunday school movement in the 19th century than with the functions organizational structures and teaching approaches discussed in current literature As I have presented these ideas in class feedback from students has consistently confirmed that my findings resonate with contexts across Asia Pacific *Affective Learning for Contemporary Education* Tom Feldges, 2024-11-15 This book dissects the relationship between the disciplines of Psychology and Education Studies to provide a new and critical perspective on the usefulness of psychological research and theory for educational purposes Assuming that affective states form an important part of how humans relate to their environment this book posits that the currently dominant cognitive approach to the field of psychology is unable to account sufficiently for this experiential reality of human life Providing a philosophical investigation of this disparity chapters offer an in depth discussion of affective states for transformative learning chart the journey of Psychology as an independent academic discipline and engage classical learning theories in order to offer a broader understanding of complex field specific arguments and engage readers from multidisciplinary backgrounds Provoking a true paradigm shift in the field of Education Studies based on its own theoretical underpinnings this book ultimately initiates a partnership between both disciplines to demonstrate a progressive and radical approach to the way we teach and think about the field of education studies This cutting edge book will be of relevance to scholars researchers and postgraduate students in the fields of Education Studies educational psychology the theory of education and the philosophy of education more broadly Senior professionals and academics who wish to expand their knowledge in relation to the international literature of this field would further benefit from this volume more broadly [A Companion to Nineteenth-Century Philosophy](#) John Shand, 2019-04-16 Investigate the challenging and nuanced philosophy of the long nineteenth century from Kant to Bergson Philosophy in the nineteenth century was characterized by new ways of thinking a desperate searching for new truths As science art and religion were transformed by social pressures and changing worldviews old certainties fell away leaving many with a terrifying sense of loss and a

realization that our view of things needed to be profoundly rethought The Blackwell Companion to Nineteenth Century Philosophy covers the developments setbacks upsets and evolutions in the varied philosophy of the nineteenth century beginning with an examination of Kant's Transcendental Idealism instrumental in the fundamental philosophical shifts that marked the beginning of this new and radical age in the history of philosophy Guiding readers chronologically and thematically through the progression of nineteenth century thinking this guide emphasizes clear explanation and analysis of the core ideas of nineteenth century philosophy in an historically transitional period It covers the most important philosophers of the era including Hegel Fichte Schopenhauer Mill Kierkegaard Marx Nietzsche Bradley and philosophers whose work manifests the transition from the nineteenth century into the modern era such as Sidgwick Peirce Husserl Frege and Bergson The study of nineteenth century philosophy offers us insight into the origin and creation of the modern era In this volume readers will have access to a thorough and clear understanding of philosophy that shaped our world The Origin of the Logic of Symbolic Mathematics Burt C. Hopkins, 2024-06-06 Burt C Hopkins presents the first in depth study of the work of Edmund Husserl and Jacob Klein on the philosophical foundations of the logic of modern symbolic mathematics Accounts of the philosophical origins of formalized concepts especially mathematical concepts and the process of mathematical abstraction that generates them have been paramount to the development of phenomenology Both Husserl and Klein independently concluded that it is impossible to separate the historical origin of the thought that generates the basic concepts of mathematics from their philosophical meanings Hopkins explores how Husserl and Klein arrived at their conclusion and its philosophical implications for the modern project of formalizing all knowledge **MLN.**, 1929 Provides image and full text online access to back issues Consult the online table of contents for specific holdings **Redburn** Herman Melville, 1969 Drawn from Melville's own adolescent experience aboard a merchant ship Redburn tells the story of Wellingborough Redburn whose innocence is transformed into disenchantment at the hands of bullying and brutal shipmates and the squalid conditions in Liverpool Taken from the authoritative first American edition this Modern Library Paperback Classic includes newly commissioned notes Copyright Libri GmbH All rights reserved Understanding Your Bible in 15 Minutes a Day Daryl Aaron, 2012-02-01 Short Friendly Beginner's Guide to the Bible The Bible can be overwhelming For those unfamiliar with this huge and ancient book it's hard to even know where to begin These short digestible readings answer questions about where the Bible came from what it's about and why it matters Daryl Aaron blends the knowledge of a college professor with the friendly welcoming tone of a pastor Broken into forty small chapters this book is perfect for those who want quick and clear answers to their questions **Ontology and Ethics in Sartre's Early Philosophy** Yiwei Zheng, 2005-01-01 At the end of Being and Nothingness Sartre made the curious claim that his ethical views follow from his ontology and are based on it Yiwei Zheng argues that there are unbridgeable gaps between Sartre's ontology and ethics that cannot be filled in and in the process provides a careful study of some notoriously murky notions in Sartre's early philosophy

Hopkins, Daniele De Santis, 2023-10-31 Volume XXI Special Issue 2023 Part 1 Phenomenological Perspectives on Aesthetics and Art Part 2 Heidegger and Contemporary French Philosophy Aim and Scope The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Reinach Scheler Stein Heidegger Sartre Levinas Merleau Ponty and Gadamer Contributors Liliana Albertazzi Dimitris Apostolopoulos Gabriele Baratelli Anna Irene Baka Irene Breuer John Brough Peer Bundgaard Justin Clemens Richard Colledge Bryan Cooke Françoise Dastur Ivo De Gennaro Natalie Depraz Helena De Preester Daniele De Santis Madalina Diaconu Arto Haapala Robyn Horner Erik Kuravsky Donald Landes Elisa Magri Michelle Maiese Regina Nino Mion Brian O Connor Costas Pagondiotis Knox Peden Constantinos Pictoulas Hans Reiner Sepp Jack Reynolds Jon Roffe Claude Romano Maxine Sheets Johnstone Michela Summa Panos Theodorou Fotini Vassiliou and Sanem Yazicioglu Submissions Manuscripts prepared for blind review should be submitted to the Editors burt.crowell@univ-lille.fr and daniel.desantis@univ-cuni.cz electronically via e-mail attachments *The Republic of Venice* Gasparo Contarini, 2020 This book provides an alternative understanding to Machiavelli's Renaissance Italy *A Desire for Equality* Michel Lallemand, 2024-07-19 Since the late 1960s individuals rebelling against societal norms have embraced intentional communities as a means to challenge capitalism and manifest their ideals Combining archival work with an ethnographic approach this book examines how these communities have implemented the utopias they claim to have in their daily lives Focusing primarily on intentional communities in the United States who have adopted egalitarian principles of life and work notably Twin Oaks in Virginia the author examines the lives and actions of members to further understand these concrete utopias In doing so the book demonstrates that intentional communities aren't relics of a bygone era but rather catalysts capable of shaping our future *The Context of the Phenomenological Movement* E. Spiegelberg, 2013-03-09 This is an unashamed collection of studies grown but not planned before hand whose belated unity stems from an unconscious pattern of which I was not aware at the time of writing I call it unashamed not only because I have made no effort to patch up this collection by completely new pieces but also because there seems to me nothing shamefully wrong about following up some loose ends left dangling from my main study of the Phenomenological Movement which I had to cut off from the body of my account in order to preserve its unity and proportion This disclaimer does not mean that there is no connection among the pieces here assembled They belong together while not requiring consecutive reading as attempts to establish common ground 1st lines of communication between the Phenomenological Movement and related enterprises in philosophy They are not put together arbitrarily but because of intrinsic affinities to phenomenology This does not mean an attempt to blur its edges But since they are growing edges any

boundaries cannot be drawn sharply without interfering with the phenomena Nevertheless in the end the figure of the Phenomenological Movement should stand out more distinctly as the text against its surrounding context of which these studies are to provide some of the comparative and historical background This is why I gave to this collection the title The Context of the Phenomenological Movement in contrast to the central text as contained in my historical introduction to this movement

Valuing the Past in the Greco-Roman World Christoph Pieper, James Ker, 2014-05-28 The classical tradition is no invention of modernity Already in ancient Greece and Rome the privileging of the ancient played a role in social and cultural discourses of every period A collaboration between scholars in diverse areas of classical studies this volume addresses literary and material evidence for ancient notions of valuing or disvaluing the deep past from approximately the fifth century BCE until the second century CE It examines how specific communities used notions of antiquity to define themselves or others which models from the past proved most desirable what literary or exegetic modes they employed and how temporal systems for ascribing value intersected with the organization of space the production of narrative or the application of aesthetic criteria

Philosophical Investigations on Time, Space and the Continuum (Routledge Revivals) Franz Brentano, 2009-10-15 Franz Brentano is recognised as one of the most important philosophers of the late nineteenth and early twentieth centuries This work first published in English in 1988 besides being an important contribution to metaphysics in its own right has considerable historical importance through its influence on Husserl's views on internal time consciousness The work is preceded by a long introduction by Stephan Körner in collaboration with Brentano's literary executor
