Rethinking Grading Cathy Vatterott, 2015-07-13 Grading systems often reward on time task completion and penalize disorganization and bad behavior. Despite our best intentions, grades seem to reflect student compliance more than student learning and engagement. In the process, we inadvertently subvert the learning process. After careful research and years of experiences with grading as a teacher and a parent, Cathy Vatterott examines and debunks traditional practices and policies of grading in K-12 schools. She offers a new paradigm for standards-based grading that focuses on student mastery of content and gives concrete examples from elementary, middle, and high schools. *Rethinking Grading* will show all educators how standards-based grading can authentically reflect student progress and learning and significantly improve both teaching and learning. Cathy Vatterott is an education professor and researcher at the University of Missouri St. Louis, a former middle school teacher and principal, and a parent of a college graduate. She has learned from her workshops that grading continues to be the most contentious part, conjuring up the most intense emotions and heated disagreements. Vatterott is also the author of the book *Rethinking Homework: Best Practices That Support Diverse Needs*. **The Cambridge Handbook of Applied School Psychology** Frank C. Worrell, Tammy L. Hughes, Dante D. Dixon, 2020-09-17 Practice books are often simple how-to lists or straightforward recipes, and the practitioner still does not know why the activity is related to the outcome they seek. In essence, they lose how the specifics of the practice are related to the theory of change or the theory of how the problem developed in the first place. This leads to practitioners potentially removing crucial elements of best practice procedures when making modifications to tackle new or different problems in an unfamiliar context. By understanding the theoretical underpinnings, practitioners can better plan for adjustments because they know how the outcomes they seek are informed by the theory. Engagingly written and perfect for day-to-day use, this book translates state-of-the-art research and interdisciplinary theory into practical recommendations for those working with children and adolescents.
