- Remove the connections to the front panel before extending the case fully open.
- Ensure that any loose clothing such as a tie or shirt stay in constant contact with the case when handling internal components.

**Explanation:** Computer cases can easily be a hazard to technicians. Before working inside a computer, examine the case edges and put tape over any of the sharp edges to prevent physical harm. A case is opened, but seldom removed when installing or removing parts. Loose clothing should be secured before you work inside a computer.

**Explanation:** When using the P-A-S-S memory aid with a fire extinguisher, the "A" in P-A-S-S is for aiming at the base of the fire and not at the flames.

3. How is a power supply commonly attached to a tower case?

- restraining strap
