Loose, Angus J. L. Menuge, J. P. Moreland, 2018-03-13 THE BLACKWELL COMPANION TO SUBSTANCE DUALISM This is a terrific volume by a long way the best currently available anthology on dualism and a worthy addition to Blackwell's distinguished series of Companions Tim Crane Central European University A major contribution to an ongoing transformation of analytic philosophy of mind Howard Robinson Central European University This high quality volume offers a rich variety of perspectives on substance dualism and will be a valuable resource for students and researchers in philosophy of mind and philosophy of religion John Cottingham University of Reading Thorough and fair the quality of the essays is high This will certainly be the book on substance dualism Michael Tye University of Texas at Austin Substance dualism has for some time been dismissed as an archaic and defeated position in philosophy of mind but in recent years the topic has experienced a

resurgence of scholarly interest and has been restored to contemporary prominence by a growing minority of philosophers prepared to interrogate the core principles upon which past objections and misunderstandings rest. As the first book of its kind to bring together a collection of contemporary writing from top proponents and critics in a pro contra format, the Blackwell Companion to Substance Dualism captures this ongoing dialogue and sets the stage for rigorous and lively discourse around dualist and physicalist accounts of human persons in philosophy. Chapters explore emergent Thomistic Cartesian and other forms of substance dualism broadly conceived in dialogue with leading varieties of physicalism including animalism, non-reductive physicalism and constitution theory. Loose Menzies and Moreland pair essays from dualist advocates with astute criticism from physicalist opponents and vice versa, highlighting points of contrast for readers in thematic sections while showcasing today's leading minds engaged in direct debate. Taken together, essays provide nuanced paths of introduction for students and capture the imagination of professional philosophers looking to expand their understanding of the subject. Skillfully curated and in touch with contemporary science as well as analytic theology, the Blackwell Companion to Substance Dualism strikes a measured balance between advocacy and criticism and is a first-rate resource for researchers, scholars and students of philosophy, theology and neuroscience.

Environmental Health and Safety Audits
 Lawrence B. Cahill, 2015-09-29. EHS auditing has been around since the mid 1970s when the Securities and Exchange Commission launched enforcement actions against three U.S. Fortune 500 companies that the Commission believed were misleading their shareholders about environmental liabilities. Since then, the profession has continued to grow and mature with many process issues still not fully resolved. For example, how do we develop a more risk-based approach? How do we measure successful performance? How can we better utilize our auditors who sometimes have skill sets limited to environmental compliance matters or health and safety compliance matters? What kind of messes can our auditors get into and how do we anticipate those? In a companion title to the 9th edition of Environmental Health and Safety Audits, Lawrence Cahill draws from his 35 years of experience in over 25 countries to address many of these issues. Along the way, he uses his personal experiences to add some reality and fun to tell the story. This book provides updated text and puts forward thoughts and trends that were not or were only briefly addressed previously. In addition, it addresses important EHS audit issues that audit program managers and auditors must deal with routinely and when special circumstances arise. The text can help to improve the management and execution of an audit program. To make auditors more effective and versatile, auditors understand the special demands of auditing internationally. The 9th Edition of Environmental Health and Safety Audits is recommended by the Board of Environmental Health and Safety Auditor Certifications.
