Clinician's Handbook of Adult Behavioral Assessment Michel Hersen, 2011-04-28 Given the vast amount of research related to behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have been advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to specific disorders many of which are theoretical rather than practical or that offer clinical advice without providing the evidence base for treatment recommendations This handbook was created to fill this gap summarizing critical information for adult behavioral assessment The Clinician's Handbook of Adult Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes computerized assessment evaluating older adults behavioral neuropsychology ethical legal issues work related issues and value change in adults with acquired disabilities Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective adult behavioral assessment *The Thinker*, 1892 Is the Good Corporation Dead? John W. Houch, Oliver F. Williams, 1996 Can corporations remain socially responsible in today's fiercely competitive global economy For several decades after World War II companies like IBM which exemplified what journalist Robert J Samuelson called the good corporation poured forth material comforts and technological ideas while guaranteeing full employment and adequate retirement In the 1980s all of that changed as corporations moved to downsize and become lean mean global competitors In this collection thirteen prominent scholars in business ethics finance management and religion and six corporate leaders respond to a new essay by Samuelson that sounds the death knell of the good corporation

They propose new approaches to corporate integrity and social responsibility in the global economy The book will be useful in corporate workshops and will make an excellent business ethics text in philosophy departments and business schools

Law, Anthropology, and the Constitution of the Social Alain Pottage,Martha Mundy,2004-06-24 This collection of interdisciplinary essays explores how persons and things the central elements of the social are fabricated by legal rituals and institutions The contributors legal and anthropological theorists alike focus on a set of specific institutional and ethnographic contexts and some unexpected and thought provoking analogies emerge from this intellectual encounter between law and anthropology For example contemporary anxieties about the legal status of the biotechnological body seem to resonate with the questions addressed by ancient Roman law in its treatment of dead bodies The analogy between copyright and the transmission of intangible designs in Melanesia suddenly makes western images of authorship seem quite unfamiliar A comparison between law and laboratory science presents the production of legal artefacts in new light These studies are of particular relevance at a time when law faced with the inventiveness of biotechnology finds it increasingly difficult to draw the line between persons and things **Leading and Managing in Canadian Nursing E-Book** Patricia S.
