In many African countries large proportions of the population rely on agriculture not only for their food but also for their livelihoods. A transformed agricultural and food system is thus a necessary condition for addressing this double triple challenge. Additionally post harvest and food waste and losses reduce the availability of sufficient quantities of safe edible and preferable foods. At least one third of food produced at farm level is lost due to inappropriate storage infrastructure and agro processing technologies in developing countries and one third of food purchased is wasted at household and retail level.
