decades are now being utilized by the oil industry to address the key issues faced by the sector This book contains a comprehensive collection of chapters written by invited experts in the field from academia and industry and provides a solid foundation of the importance of microbes to the oil and gas industry It is aimed at microbial ecologists molecular biologists operators engineers chemists and academics involved in the sector **Boys, Young Men and Violence** Ken Harland, Sam McCready, 2015-10-29

This book draws upon data collected over an 18 year period with over 1000 boys and young men across Northern Ireland Providing critical reflections on violence masculinity and education it uses the voices and experiences of young men to inform and influence research practice and policy **The Heartbeat of Innovation** Edward Shorter, Hugh E. Scully, Bernard S. Goldman, 2022-03-01 Great innovations take place within great institutions Founded in 1819 Toronto General Hospital TGH is one of Canada's oldest hospitals and has created a nurturing environment for early Canadian innovations in heart surgery The Heartbeat of Innovation tells the story of the brilliant surgeons who worked there and the hospital environment that provided an incubator to the many people skilled perfusionists dedicated nurses and pioneering cardiologists who participated in the revolution in heart surgery that took place along University Avenue in Toronto Supported by historical records hospital archives personal memoirs and interviews this book is an extensive and descriptive account of the seemingly inexorable development of cardiac surgery at this leading academic health science centre It pursues several themes the complexity of this surgical specialty its generally male dominated nature the trend toward teamwork in practice and the evolution and incorporation of original research into this branch of healthcare These strands are woven together to demonstrate how the TGH has evolved into such a dominant leader in the competitive and demanding field of cardiac surgery Canadian hearts may beat with pride at the knowledge that one of the major stories in modern medicine took place here and continues here **Technological Innovation in Legacy Sectors** William B.

Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in

the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system
