What are some differences you have noticed in the size and shape of dogs in your neighborhood?

Do their differences make them better at some things, but not well-suited for others?

What would happen if the world suddenly changed, so the only thing that dogs could eat was deer and there was absolutely no way for a dog to eat if it wasn't big or strong enough to catch and kill a deer?

Most likely, smaller dogs would die off and the bigger ones would survive and reproduce. After a while, instead of a population of dogs of all sizes, most of the dogs in the population would be big dogs.

Describe what is happening in figures 1-3. Is the population of mice different in figure 3 than in figure 1? Explain why.
