The state of Pennsylvania has a long history of providing quality education for all its citizens. In 1963, the state passed the Education Reform Act, which established the Department of Education. The act also created the Office of Statewide Assessment, which is responsible for developing and administering the Keystone Exams. The exams are designed to measure student learning in mathematics, science, and history/social studies. The exams are administered in the spring of each year. The results of the exams are used to determine if students are ready to graduate from high school. The exams are also used to identify students who need additional support. The exams are a key part of the state's education system. The exams are designed to be fair and to measure student learning in a valid and reliable way. The exams are also used to provide feedback to students and teachers. The exams are a valuable tool for improving the quality of education in Pennsylvania.
