Coordinating Research Council Research Techniques for Automatic Transmission Fluids S. R. Calish,1963 This report covers the significant CRC work on passenger car automatic transmission fluid test techniques including photographs of test equipment and a brief summary of cooperative test results TX-200 TRANSMISSION OIL COMPATIBILITY PROGRAM ,1961 A procedure was developed for laboratory compatibility tests with the TX 200 transmission Using this procedure a referee base line condition was established for the TX 200 2X transmission with MIL L 2104A OE 10 M14500 REO 14861 oil The objectives of the tests were to evaluate MIL O 10295 OE S arctic engine oil and MIL L 2104A OE 30 engine oil as automatic transmission fluids and to compare the results of the laboratory tests with actual cross country test course operation These tests showed that with reference to the established base line MIL O10295 OE S REO 127 oil is incompatible However the laboratory test cycle is less severe on clutch wear and more severe on low range gearing than the 5000 mile cross country test Thus it is recommended that a 5000 mile cross country test be run in a cold climate with arctic engine oil as the transmission fluid to determine whether or not low sun gear failures could occur during actual field operation The MIL L 2104A OE 30 M14804 oil was compatible with the transmission except for breakdown of the polyacrylate piston seals Bench type investigations should be conducted to determine the cause of seal failure *Base Oil Requirements of Evolving Automatic Transmission Fluid Specifications* Joe Noles,T.
