the engineer or scientist that most of them no more realize that simple fact than fish realize what water is One who did was the greatest Thermodynamicist of all Ludwig Boltzman As so often happens seeing a greater perspective led him to write in his case the essay Travels of a Thermodynamicist in California but also to his profound depression which he successfully and appropriately resolved by hanging himself from a hotel room chandelier I thank the dearth of chandeliers in today s La Quinta and Econolodge hotels for my having thus far escaped emulating even that element of Boltzman s greatness and thus providing the time for writing this book Such is the importance of travel I owe my life to budget hotels How did I decide to compete swimming breaststroke pick up the Cello pursue long distance solo cycling and do a PhD in Thermodynamics The common denominator is the search for a pursuit so archaic so unappealing to the opposite sex or even my own so widely ignored that even I with minimal effort could if not dominate at least get to the first wrung on a competitive sports music or career ladder That strategy propelled me to the 1 and not coincidentally the only position worldwide in authoring books on microspacecraft A quick scan of Amazon or your local bookstore tells you why I will never write a book on starting a company or pioneering a new field in Engineering The shelves are full of well written books I couldn t hope to outshine But a book on the experiences and the lessons learned from a career of mostly pointless business recreational and competitive travel there s a niche even Rick Fleeter can own for a long time And dear potential reader therein might lie a similar opportunity for you to be unique in having actually purchased and read that book For 59 can you bypass the opportunity to be the first on your block and maybe on the planet I hope not
