Image Processing Systems in Business Robert J. Thierauf, 1992-05-20 A common complaint heard in today's business office is There is paper everywhere but I cannot find the document that I'm looking for It is estimated that 90 percent of all data and information currently being processed and distributed within offices and between organizations resides on paper Finding the physical space to store this paper can be a key problem To overcome this problem and others there is a need for a dramatic new approach to information processing found in business Such an approach is found in this unique and useful volume Essentially image processing systems in business use today's computer technology to solve paper processing and storage problems Their main means of processing is performed electronically that is documents are captured initially on an electronic medium and forwarded to other users in the same mode In this manner their essential means of communicating with users is in an electronic format versus a paper one Also image processing systems in business are much more flexible in meeting changing user needs especially when the data is stored on optical disk **ABA Banking Journal** American

increased performance and stability especially in comparison to Windows ME a more intuitive user interface improved hardware support and expanded multimedia capabilities However some industry reviewers were concerned by the new licensing model and product activation system Extended support for Windows XP ended on April 8 2014 after which the operating system ceased receiving further support or security updates to most users As of May 2018 2 98% of Windows PCs run Windows XP and therefore XP represents 2 5% of the overall desktop operating system market share In the late 1990s initial development of what would become Windows XP was focused on two individual products Odyssey which was reportedly intended to succeed the future Windows 2000 and Neptune which was reportedly a consumer oriented operating system using the Windows NT architecture succeeding the MS DOS based Windows 98
