Technologies Conference (FTC) 2020, Volume 2 Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-10-31 This book provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research. The fifth 2020 Future Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security, and communications and their applications to the real world. After a double blind peer review process, 210 submissions including 6 poster papers have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies but also to promote discussions and debate of relevant issues, challenges, opportunities, and research findings. The authors hope that readers find the book interesting, exciting, and inspiring.

The Software Catalog MENU Staff, Menu, 1987 **AI Breakthroughs** Gopee Mukhopadhyay, 2025-01-03 The illustrations in this book are created by Team Educohack. **AI Breakthroughs: Theories and Concepts for Today** is designed to guide readers through the essential scientific and technological principles that make artificial intelligence (AI) possible. We aim to enhance understanding of AI's development and its pervasive role in our lives. We explore two fundamental questions: Should AI replicate human performance through machines, or should it emulate the way humans think and act? This book discusses classical AI and machine learning (ML), the two main approaches to AI. While classical AI, dating back to the 1960s, uses logic and representations to mimic human reasoning, ML, a newer method, focuses on manipulating numbers and statistical patterns to find answers. Drawing insights from Daniel Kahneman's *Behavioral Economics*, we demonstrate that purely rational AI, operating solely on logical symbols, does not reflect human thought processes. This book is crafted to support students, helping them grasp each concept in detail and ensuring they benefit from a thorough understanding of AI.

Cases on Enterprise Information Systems and Implementation Stages: Learning from the Gulf Region Albadri, Fayeze, 2012-10-31 After the introduction of Enterprise Information Systems (EIS) and Enterprise Resource Planning (ERP) applications to many business organizations, the functional issues such as technical problems, security threats, persistent end-user resistance, and the excessive hidden costs of these systems began coming to light. *Cases on Enterprise Information Systems and Implementation Stages: Learning from the Gulf Region* focuses on the Gulf region and its lead on the enterprise systems adoption, which has exceeded those in many developed countries. This reference book highlights experiences implementing EIS, delivering a comprehensive multi-perspective account of EIS issues and exploring the concerns, risks, and critical success factors of EIS for a variety of organizations. It aims to be beneficial for both practitioners and academics alike.

Delivering Value with BIM Adriana Sanchez, Keith Hampson, Simon Vaux, 2016-03-31 Building Information Modelling (BIM) is a global phenomenon which is gaining significant momentum across the world. Currently, there is little information on

how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure Additionally the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses
