Intel Dq965gf Motherboard Specs:

Communications and Multimedia Security Bart De Decker, Ingrid Schaumüller-Bichl, 2010-05-29 Over the last decade we have witnessed a growing dependency on information technology resulting in a wide range of new opportunities. Clearly it has become almost impossible to imagine life without a personal computer or laptop or without a cell phone. Social network sites, SNS, are competing with face-to-face encounters and may even oust them. Most SNS adepts have hundreds of friends happily sharing pictures and profiles and endless chitchat. We are on the threshold of the Internet of Things where every object will have its RFID tag. This will not only affect companies who will be able to optimize their production and delivery processes but also end users who will be able to enjoy many new applications ranging from smart shopping and smart fridges to geo-localized services. In the near future elderly people will be able to stay longer at home due to clever health monitoring systems. The sky seems to be the limit. However, we have also seen the other side of the coin: viruses, Trojan horses, breaches of privacy, identity theft, and other security threats. Our real and virtual worlds are becoming increasingly vulnerable to attack. In order to encourage security research by both academia and industry and to stimulate the dissemination of results, conferences need to be organized. With the 11th edition of the joint IFIP TC 6/TC 11 Conference on Communications and Multimedia Security, CMS 2010, the organizers resumed the tradition of previous CMS conferences after a three-year recess. **The I750 Video Processor Technical Specifications**, 1990 **Intel 486 Processor Family** Intel, McGraw-Hill Companies, 1995-01-01 **Intel MCS-40 User's Manual for Logic Designers** Intel Corporation, 1974 Intel 386 TM Microcomputer Model 302-20 Board Technical Reference Manual Intel Corporation, 1989 *I486 Processor* Intel Corporation, 1990
